

Appearance of Car Big Hit to Sales

Times change. Once the automobile was the symbol of wealth and power, it is now the symbol of necessity. The new car is not only a means of transport, but a statement of style and taste. The latest models are designed to meet the needs of the modern man, offering comfort, speed, and reliability. The car is no longer just a machine; it is a companion, a friend, and a symbol of progress.

Will Rogers
Remarks:
NEW YORK, May 1. (AP)—The
[To the Editor of The
Times:] Just flew in here
from Beckley, W. Va.
When Casey Jones, the
famous Curtiss aviator,
landed me on the field
after just two hours and
twenty minutes from
Washington, D. C., they
had the big Bellanca plane
out on the field and
Chamberlain, the pilot,
who is to take it to Paris,
took me up in it. It's a
great sample. All we need
is thousands of them. It
looks like a big night at
our show tonight. Mc-
Cormack and I are argu-
ing over who will open
the show. Mr. Coolidge is
going to make another
Red Cross appeal for
more funds. Don't stop at
your quota. This is the
biggest need we ever had
in this country. Thank
you.

Fire Destroys Izaak Walton's Historic Home

LONDON, May 1. (AP)—The cottage
at Shallowford near Stafford,
home 350 years ago of Izaak Walton,
British writer whose fame has come
down the years as the author
of the "Complete Angler," was
destroyed by fire today. A flying spark
settling on the thatched roof of the
cottage started the fire.

ONE DEAD, THREE HURT IN UPSETTING OF CAR

SAN FRANCISCO, May 1. (AP)—One
man was killed and three hurt
when a car upset here today.
The car, a 1926 Ford, was
driving through Golden Gate Park
when it hit a low wall and
overturned. The driver, a man
named [Name], was killed.
Three other people were hurt.
The car was carrying a family
of four.

STILETTO GUARD FOR AIRPLANE

Six Fascisti Relax Vigil as
Trip With Santa Maria II
for De Pinedo Ends

NEW YORK, May 1. (AP)—Six
men with six stilettoes kept a
twenty-four hour vigil outside the
airplane Santa Maria II all the way
across the Atlantic. It arrived here
today, when the plane arrived here
after the Duilio. The Santa Maria II
will replace the destroyed plane of
the Marchese Francesco De Pinedo,
Italian aviator now in New York on
his way around the world.

SLAYER AWAITING Chair Tries to Commit Suicide

NEW YORK, May 1. (AP)—The
murder of Frank P. Scavullo promp-
ted George A. Ricci to attempt suicide
today in his cell in the [Name] jail.
Ricci, who was charged with the
murder of Scavullo, was found
hanging from a chair in his cell
this morning.

DELEGATES FROM India to Geneva Meet Protested

LONDON, May 1. (AP)—Em-
phatic protests are reaching England
from the Hindu chambers of com-
merce against the personnel chosen
by the British Indian government to
represent India at the Geneva
world economic conference open-
ing next week.

YOUTH KILLED WHILE RIDING ON GIRL'S LAP

BRADLEY BEACH (N. J.) May 1.
(AP)—Police tonight admitted they
were baffled by the mystery of the
slaying of Arnold Bennett, 19-year-
old son of a wealthy family, who was
killed while riding on the lap of a
girl in a crowded roadster in
Main street. Although convinced the
shot was fired from the street, au-
thorities continued to question the
companions of Bennett, a youth and
three girls. The party was returning
from a dance.

"YELLOW PERIL" WINS FOR CHINESE ORATOR

CHICAGO, May 1. (AP)—Glen Ginn,
a Chinese student at Park College,
Parkville, Mo., won the fifty-third
annual oratorical contest of the In-
ternational Oratorical Association at
Northwestern University with an
address entitled "The Yellow Peril."

Mexico Reports General Killed by Yaqui Band

NOGALES (ARIZ.) May 1. (AP)—
Gen. Jesus Aranda was reported
killed while leading Mexican Fed-
eral troops who clashed with a band
of 250 Yaqui Indians believed to be
engaged in smuggling arms and am-
munition across the international
boundary line.

School Founded for Giving
Scientific Training to
Domestic "Mistresses"

NEW YORK, May 1. (AP)—New York
society leaders expect to train their
own household employees and ele-
vate domestic service to the dignity
of a profession.
Scientific Housekeeping, Inc., a
co-operative organization formed by
a group of society matrons, every
one of whom is listed in the social
register, is the medium through
which this effort will be made.
Mrs. Richard Boardman has been
elected president; Mrs. Henry C. Pat-
erson, vice-president; Mrs. Vinton
Frederick, secretary; and Mrs. John
Mulliken, treasurer. The directors will
be Mrs. Henry C. Bartol, Miss Eva
T. McAdoo, Mrs. Francis Carter Wood,
Mrs. Charles Arthur Richards, Mrs.
Robert S. Walker, Mrs. Morrill God-
dard and Mrs. Langdon Geer and
Mrs. James D. Pell, honorary direc-
tors.

VISIONS SEEK BOX SECRET

Mediums and Latest Rays of Science Will Attempt
to Penetrate Mystery of Southcott Chest

LONDON, May 1. (AP)—Mediums, television and other most powerful
visions will be brought into play to penetrate the inner secrets of
Joseph Southcott's famous mystery box by X-ray tests fail to reveal its
contents. The mahogany box of the prophetess who had a large following
from her death in 1814, is in the possession of Harry Price, secretary of
the National Laboratory of Psychological Research, and it will be opened if all
other tests fail.

BULLOCK & J
LOS ANGELES
Corner Seventh and
Hope Streets

practicable, feasible, and economic means for affording flood protection for the valley as a whole."

Gas Appliance Adjustment for All

GAS consumers of Los Angeles Gas and Electric Corporation are now receiving natural gas of about 30% higher heating quality than the mixed gas formerly supplied. In order to get the full advantage of this greater heating value, appliances must be in correct adjustment to burn the richer gas efficiently.

To help consumers get the best possible service from natural gas, we are repeating some of the information about appliance adjustment and gas service which appeared at the time of the change to natural gas.

In addition, we have placed in the field a large special force of men whose sole duty is to adjust all ordinary gas appliances, such as ranges and room heaters.

This service is free.

Already our men have called on many thousands of our patrons, but with more than 345,000 gas meters on our lines it will, of course, take considerable time to get over the entire system.

Every consumer will be visited in due time and as soon as possible. If any are having serious trouble, however, they should call our Gas Appliance Adjustment Department, FABer 5300, and we will send a service man ahead of the regular adjustment schedule.

There are some appliances, such as certain automatic water heaters and other devices, which, because of their complicated design, must be adjusted by someone thoroughly familiar with their construction. In such cases it is advisable to call the dealer who installed the appliance.

Other statements in relation to natural gas service will be published in the near future. Watch for them.

Los Angeles Gas and Electric Corporation

The Policies that direct BANKING RESOURCES of 327 MILLION DOLLARS

No. 1 INTRODUCTION

THE LAST FIVE YEARS have witnessed an evolution in American banking.

To trace briefly that development, as exemplified in our own organization, we first must know something of the component parts of this organization which is unique in set-up. They are three.

1. THE FIRST NATIONAL BANK OF LOS ANGELES, a national bank under Federal Law, with capital, surplus and undivided profits of \$8,000,000 and total resources of more than \$100,000,000. For fifty years it has been a leader in commercial banking in the Pacific-Southwest. Under such virile leadership as that of J. M. Elliott, Stoddard Jess and Henry M. Robinson, it has been conspicuous for vision, courage and constructive banking service reaching far beyond state borders.

2. THE PACIFIC-SOUTHWEST TRUST & SAVINGS BANK, a state bank under the California departmental banking law, with capital, surplus and undivided profits of \$14,000,000 and resources greater than \$225,000,000, doing commercial, trust and savings banking.

3. THE FIRST SECURITIES COMPANY, with capital and surplus of \$1,100,000, handles our investment banking business and performs admirably other financial functions not strictly banking.

This trinity, operating under identical ownership and management, has been responsible in no small measure for the evolution of Banking in the Pacific-Southwest during the past five years.

Barthelme
President, Pacific-Southwest Bank,
Executive Vice-President, First National.

POLES PREPARE FOR OCEAN RACE

Dark Horse Biplane Being Groomed Near Paris

Army Men to Enter Nonstop Trans-Atlantic Flight

Backed by Owen Government With Army Machine

PARIS, May 1. (Exclusive)—Out at the Villa Coublay flying field hitherto unnoticed by virtually all except a few aviation officials is announced a high all-metal, 600-horsepower, single-engine biplane which is the dark horse of the trans-Atlantic nonstop air race.

It is owned by the Polish Army Aviation Service and in it two Polish flyers hope to outlast and outspeed the French and American contenders for trans-Atlantic honors. The aviators are Capt. Idzikowski and Capt. Kubala, his observer.

Backed by the Polish government and equipped with probably the most powerful machine of all the rival expeditions, they are rushing their preparations with such extreme secrecy that not even the French press has as yet carried a line about their presence at Villa Coublay or the unique equipment on which they will rely.

TESTS SATISFACTORY
Idzikowski and Kubala have been in France for several weeks and have made several satisfactory test flights. The biplane is an Alcot biplane with a Lorraine motor, the single engine has such tremendous power that it is estimated that it can carry 6000 litres of gasoline, far more fuel than any of the other contestants can carry. Idzikowski says it is capable of flying much faster than New York in a single hop.

The biplane has two features especially adapted to trans-Atlantic flights. The seats are built so that the backs can be released, transforming them into couches. Thus the relief man will be able to sleep during the flight. It also provides for the possibility of forced landings on the ocean. By pushing a button the wheels can be dropped in flight and the plane, the body of which is constructed like a boat, can glide on the water. Pressing another button the aviators can discharge the heavy load of fuel during the descent, thus lightening the ship so it will float for many hours.

PLAN TAKE-OFF IN JUNE
The Poles still have many tests to complete and do not expect to be ready to take off until about June 1, they are making flights each day from Villa Coublay.

Idzikowski says frankly that he considers Clarence G. Chamberlain's and Lloyd W. Bettraud's chances of success the best of any of those nearly ready. Although he sees Hungary's activities daily apparently he is not too optimistic. Of the French he would pick Lieut. Coste, who set the nonstop record last year and who also is preparing for trans-Atlantic flight, but Coste will not be ready for a long time. Meanwhile the Poles are examining the reports of the Americans' preparations with the greatest interest.

SHOOTING

W. D. Murphy and E. C. Grossman split the two matches between them at the Sunday shoot of the Rifle Club, three two parties taking down three and second in the one match, and second and first in the other at the Los Angeles Rifle and Revolver Club yesterday.

Ned Moore of San Francisco, a member of the United States International Rifle Team of 1925, and probable captain of the California Civilian Rifle Team for this year, to go east to Camp Perry, was a visitor at the range and showed the outfit how the international rifle game is really played.

Old reliable Ned Cutting with a borrowed rifle hung up the fine off-hand score of 86, his first score in nearly a year, and indicating the value of a long rest.

Next Sunday men the matches of the Southern California Rifle League at the Rossmore range of the Los Angeles Rifle Club.

Los Angeles Rifle and Revolver Club: Homer Bargett Trophy, ten shots kneeling, ten prone and ten standing, 300 yards, international target, possible score, 250.

W. D. Murphy... 244 E. C. Grossman... 184
Capt. E. C. Grossman Trophy, ten shots, 200 yards, any 22 caliber rifle, international target, possible 100 yards.

BRUN FROSH WIN
POMONA COLLEGE (Continued)
May 1. (Exclusive)—Bill Ackerman's U.C.L.A. freshmen had a big seventh inning here yesterday, scoring six runs on as many hits and thereby trimming the Pomona Frosh baseball team, 13 to 5. For the first six innings, it was a good game, the Frosh leading 5-0 to 3-0, but U.C.L.A. broke loose in that lucky seventh, knocking Cliff Bright out of the box and from then on they had the struggle all their own way. Score: W. C. L. A. FROSH: POMONA FROSH

SOCCERITES PLAY TIE
NEW YORK, May 1. (AP)—The Hoboken soccer team of Virginia in the third game of the American tour, played a 2-2 draw with the New York Giants of the American Soccer League before a throng of 38,000 at the Polo Grounds today.

GOOD-WILL TRIP WILL END TODAY

Pan-American Flyers to Be Greeted by Coolidge

President to Give Welcome in Name of People

Air Journey of 20,000 Miles Finishes at Capital

WASHINGTON, May 1. (AP)—Awaited by President Coolidge, who will welcome them back in the name of the American people, and by other high officials, the army Pan-American flyers tomorrow will bring to a close their 20,000-mile good-will flight. Headed by Maj. Herbert A. Dargue, the four Lorraine amphibian planes will land at Bolling Field at 8 o'clock from Langley Field, Virginia, ending their mission of good will which took them to all of the Latin-American countries. Under present plans the aviators will be greeted by President Coolidge immediately upon their arrival, being presented by Secretary of State Kellogg and Davis of the War Department. With the President will be members of his Cabinet, all the Latin-American diplomats in Washington, representatives of the Pan-American Congress and Congress members of Congress, and ranking army and navy officers.

The American flyers, who in addition to Maj. Dargue include Capt. Arthur B. McDaniel, Capt. Ira C. Baker and Lieut. Ennis C. Whitfield, Charles Mack Robinson, Muir S. Fairchild, Bernard S. Thompson and Leonard D. Weddington, will be accompanied from Langley Field to Bolling Field by an escort of planes carrying Assistant Secretary of War Dargue and Maj. Gen. Patrick, chief of the Army Air Service.

An elaborate reception program has been arranged. Bolling Field, including an army band concert and a flying exhibition by army pilots under the leadership of Maj. Burwell, commandant of Bolling Field. A sorrowful phase of the homecoming will be the absence of Capt. Clinton F. Woolsey and Lieut. John W. Benton, who were killed when their plane collided with Maj. Dargue's at Buenos Aires.

PIGEON RACE

The first official race of the Southern California Pigeon Racing Association was flown from Bakersfield yesterday with 160 birds competing from twenty-one lofts. Weather conditions were very favorable. Glen Wilda was the winner with a velocity of approximately forty-five miles per hour. Other finishers in order: Robert, 1:20:50; W. H. Smith, 1:21:00; W. H. Smith, 1:21:10; W. H. Smith, 1:21:20; W. H. Smith, 1:21:30; W. H. Smith, 1:21:40; W. H. Smith, 1:21:50; W. H. Smith, 1:22:00; W. H. Smith, 1:22:10; W. H. Smith, 1:22:20; W. H. Smith, 1:22:30; W. H. The Great Mail Music

Fun Fans Entertained

BY BOB RAY

The Hollywood Stars won the first game of the season by splitting even with the San Francisco Seals in yesterday's opening match at Wrigley Field. The Stars made a profitable week by copying the opener which was quite an exciting struggle, 7 to 6, but they took a 13-0 shellacking at the hands of the Seals in the nightcap, which was even more lopsided than the first game.

The contest had been delayed by the visitors "The Seals," who had the win-ning run scored by San Francisco's outfielder, who was the State's champion, and for real and honest, his minister came out on the coaching staff, played several reg-ular, "Hollywood, Why don't you be good?"

THEY TOO INTERESTED

The (Hollywood) Stars, who was a team better yesterday, became a team in the post-season final.

Thompson Loses to Moser at Lakeside

BAMBINO RUINS PHILADELPHIA

Crowd of 60,000 Fans Sees Macks Defeated

Ruth Gets Fifth and Sixth Circuit Swats

Gehrig Also Hammers Out Four-Base Blow

NEW YORK, May 1.—Babe Ruth was Queen of the May here today. The mighty bambino pounded out two home runs and the Tankers thumped the Philadelphia Athletics, 7 to 3, taking undisputed possession of first place. The circuit clouters were Nos. five and six for George Hershman, who is off to a good start in his campaign for the record number of homers.

More than 60,000 fans saw the game and were rewarded with the mighty clouting of the highest-salaried athlete in the game. Babe opened up right under the gun, socking his first homer in the first inning with one man on base. Ruth then waited until the eighth to crash out his second circuit swat, this time with the legs of pedestrians. Lou Gehrig, who is giving Ruth a real race of

PIRATES FACE ALL-STARS

Pittsburgh Hockey Team Goes Against Picked Local Squad at Winter Garden Tonight

WILL BRODEUR

Elated over the selection by a committee of hockey officials of ten players from the Richmond, Maroon and old Globe teams to comprise an organization to be known as the All-Stars and which will cross sticks tonight with the Pittsburgh Pirates of the National Hockey League, Capt. Abbie Newell of the Richfields and Manager Kenzie McKenzie of the Maroons, are hard at work wedding the star players into a great hockey team.

The individual strength of the outfit cannot be questioned for in the list of players handed the leaders are names of some of the most spectacular and skillful ice athletes who ever played in any man's league. The task confronting Newell and McKenzie has to do with injecting the spirit of team-work in the 10 or 11 individuals. Sometimes that job is far more difficult than developing from the ground up a new team of players.

It is conceded among hockey experts that Newell and McKenzie are crafty and able leaders. Both declare they will have no skill about the all-stars fail to wreck the Pirates.

While Capt. McGuire of the Pirates declares that he would refuse the opportunity to add to his crew any other player in the National League.

Root Blows Up in Ninth to Give Pirates 7-to-6 Victory; Chisox Take Six

WEAKENS AFTER BIG CUB RALLY

Olson Clicks Out Homer for Bruins With Three On

Robins Ring Up Third Victory by Trimming Giants

Cardinals Wallop Reds; Off on Lengthy Tour

CHICAGO, May 1. (AP)—Charley Root blew up in the ninth inning after walking three men was ejected for a hit which sent two men across the plate, giving Pittsburgh a 7-to-6 victory over Chicago. The Cubs came from behind, overcoming the visitors' lead with a hit of home runs by Hack Wilson and Charley Feltner, the latter tagging his way to home plate in the seventh inning. A crowd of about 25,000 was present. The score: PITTSBURGH 7, CHICAGO 6.

VANCE IN FORM

BROOKLYN, May 1. (AP)—Brooklyn won the game in the ninth with a two-run rally today to win a third consecutive game by 4 to 3. The short center by Pinch Hitter Jacobson allowed Carey to come home from third with the winning run. It was Vance's first win in the present campaign. He struck out seven batters and allowed three errors in the win.

OBSERVATIONS

BY THE OBSERVER, BILL HENRY

WHEN Byron Summers pedaled across the Catalina Channel in about three hours less than George Young did in the Wrighty swim, he not only got himself a lot of favorable publicity, but he swam a lot of glory from the Canadian boy wonder by his sensational time. Granted that Summers is a very fine swimmer, which he unquestionably is, there can't be any doubt at all that he had more favorable conditions than Young. We aren't prepared to say that Young could ever beat him and have no desire to take and any of Summers' glory, but we will state here and there that he isn't a swimmer in the true sense of the word, making three hours faster time than Young ever did in the same swim and under the same conditions.

We have a suspicion there will be a lot of excitement when the two swimmers get together in the world as to the swimmer who could use a little ready cash—(Or could he?)—and they certainly are able to command some for appearing in a dual contest. Minimum, every time the boys are mentioned the newspapers find it necessary to write the swimmer who is the better swimmer, but that makes Bill Wrighty feel that there is no doubt at all but that the Catalina Channel swim was the biggest publicity getter that the sport world has ever seen. It will be a long time before anybody thinks up an event that will produce as many inches of publicity for any swimmer as this did for Catalina.

HOLLYWOOD NABS SERIES

Stars Capture Exciting Opener, 7-6, But Lose in Nightcap, 13-0; Mails Entertains Fans

(Continued from First Page) Piper of San Francisco's entertainment during the sixth inning that allowed him to pitch and Johnny Root to catch him off second base. However, Root didn't seem to mind the extra inning, but the extra inning was a little more than the fans could stand. The game was a real thriller, and the fans were in for a real treat. The score: HOLLYWOOD 7, SAN FRANCISCO 6.

The Hollywood sixth saw the last of May, despite the fact that it was only May 1. The stars put on an extra five runs during this inning. Sweeney opened up by drawing a pass, but L. Sheehan struck out. Sweeney and Twombly drew walks, and Kerr came through with singles, filling the bases. McDowell, hitting for Sweeney, scored, scoring Sweeney and Twombly. Dick Mowbray replaced May on the mound and Denny Murphy went in to bat for Cook. Murphy singled to center, scoring Kerr and sending McDowell to third. Murphy hit a home run, allowing McDowell to score and Murphy to take third. Let's hit to center brought Murphy across with the fifth run of the round. Gooch was thrown out by Dittmer and Sweeney fanned to end the inning.

The Seals picked up a run off Hollywood in the fifth when two pinch-hitters came through with singles. After Dittmer had whiffed, Gooch hit a home run, scoring Sweeney and a star roller to Kerr. Sweeney was hit for Mowbray and punched a single to center, putting Sweeney on third from where he scored on Johnson's grounder to McDowell.

Hollywood put over what proved to be a home run marker in the home half of the sixth when Murphy delivered his second hit, a single to left, was sacrificed to second by Murphy, took third on Lee's lead.

What we'd like to know is if it's a mark which Ralph Smith set at Santa Ana while competing for the Diego High School in 1927. Of course, 1927 really isn't so long ago and maybe the powers that be really intend to put Smith's record on the books in the near future. It is our belief that Jack Williams bettered 1927 while at Longwood and that Lee Barnes did better than 1927 while at C.I.P. and some day the record book will probably be changed up.

Washington, May 1. (AP)—Making his first major league start, Eddie Heiser of the Washington Senators held Boston to seven hits and two runs in a 7-to-2 victory. Heiser, a rookie, pitched well and the Senators won easily. The score: WASHINGTON 7, BOSTON 2.

Members of the Smoky City organization are not too optimistic over the outcome of tonight's game. McQuire yesterday postponed until later in the week a trip to San Diego which had been scheduled for yesterday. He said he is taking no chances and will not leave the team until he has had a chance to see the players and to play an entirely different game from the one he has been playing.

Miss Elise Greene, popular Los Angeles Athletic Club director of women's athletics, was forced to undergo an operation last Saturday night at the Hollywood Hospital for acute appendicitis. It is reported that the operation was successful and that the patient is resting easily. The regular season of the club classes for women will be held as usual during Miss Greene's absence.

ISLAND BONE CRUSHERS PARK HERE

The Hawaiian Islands' wrestling team, an organization of professional wrestlers whose home and province has long been Hawaii, arrived here Saturday on the steamer Oahu to try their strength against representative United States organizations. Several members comprise the team, of which one outstanding member is Matsunomori, a gigantic Japanese, who wears native Japanese attire exclusively. The members of the team, who each possess a name guaranteed to test the patience of any inquisitive man, are Matsunomori, Sunayama, Sakuraga, Matsunomori, Matsunomori and Matsunomori.

CHUCKLES from LIFE

Mrs.: I do believe conversation is becoming a lost art.
Mr.: Well, there's no use talking all night about it!

The Fugitive
What a charming evening it was!
What a superbly fascinating company! And for hours the egotist gazed about him and listened with the keenest appreciation. It was delightful, he reflected, to be surrounded by such engaging society—certainly a unique experience, and a smile of unalloyed pleasure crept over his face. Never before had he heard such interesting conversation. Such sparkling wit, such flashes of wisdom.

As the dawn broke, he rose and turned off the phonograph containing the record of his own voice. Then he slowly walked out of the hexagonal room, the wall of which consisted entirely of mirrors.

Facts in Favor of Chicago
THE FACT THAT:
Her taxi-drivers didn't immediately try to rob me.
Her hotels never charged any mysterious extras on my bills.
I was never molested by law-breakers or policemen in Chicago.
No Chicago landlord ever raised my rent—much.
Chicago bootleggers never sold me any poison liquor.
Chicago business men, speaking.

ing generally, never broke an agreement with me.
The climate of Chicago never seemed to affect me unfavorably.
I was never in Chicago.
—Sherman Ripley.

Proof Enough
Mrs. Carr (after a motor trip in the country): I'm afraid our child is not normal, James.
Carr: What's the sign?
Mrs. Carr: We must have passed at least a hundred hot-dog stands and he never even dropped a hint.

A Cinch
Crawford: Your wife is such a good bridge player. I hope she's found some one to play with up in the Mountains.
Crabshaw: She's found her. She hasn't written to me for more money in nearly a month.

Fable
Once upon a time there was a man who never left his commutation ticket in his other coat.
The Opportunist
"The weather is more settled now."
"Yes; I just came across the street and it was nice all the way."

OPTIMISM NOTE ON ARMS PACT

Progress Made at Geneva Conference Cited

Three-Power Treaty on Navy Curb Predicted

Way Opened for Limiting of Land Forces Also

WASHINGTON, May 1. (Exclusive). While disappointed over failure of the League of Nations' preparatory disarmament commission to work out a draft treaty, Washington officials feel progress toward limiting armaments was made at the Geneva discussions.

Those inclined to be optimistic point out that the commission, which was called together to work out agenda for a later international disarmament conference, reached substantial agreements on two important problems. These agreements related to phases of the general question of land armaments and to aviation.

There was no surprise here that the commission adjourned without breaking the deadlock on the method of approaching naval limitations. President Coolidge was felt all along that the question of limiting navies was one which should be isolated from the general disarmament discussion and dealt with by the large naval powers concerned. It was with this in mind that he called the forthcoming three-power conference.

Officials here express confidence the President's conference will result in the actual signing of a treaty by Japan, England and the United States.

TOPPERS STOP WILD DRIVERS

Slit Hairs' Best Insurance Against Being Run Over in London

LONDON, May 1. (AP)—Slit hairs are the best insurance against being run over by a motor car in the London traffic jam.

Bus and taxi drivers generally regard the storekeeper hat as the insignia of a noble lord, and no self-respecting driver could dream of running down such a superior person.

As a matter of fact high hats are now worn more by bank clerks and messengers than by members of the nobility. But the tradition still persists that the morning coat and pig hat are the uniform of quality.

In the swirl at Piccadilly Circus and Trafalgar Square traffic cops always halt traffic for members of the high-bat brigade, and in less congested centers, where there is no official control, the drivers themselves halt for the slit hat.

States which will limit cruisers and the other naval craft not included in the Washington treaties limiting battleship tonnage.

This, it is hoped, will furnish the League's commission with a basis on which they can work out a general naval-disarmament method for all governments.

With land armaments long the stumblingblock for any serious consideration for disarmament by the European nations, the commission laid the basis for future consideration by determining how they may be gauged and of what they actually consist. Much of the difficulty at Geneva at first centered about the question of whether a nation's strength consisted of the number of men she could put into the field, or whether potential wealth and industrial strength of a nation should be a factor.

According to conclusions of the conference, reduction of land forces should be effected by limiting the number of men each nation maintains in its regular army or on a military basis. The test is the man power which could be employed immediately in an emergency. There were many qualifying definitions and reservations thrown about this agreement and it did not go so far as to attempt to specify in this preliminary conference the number of soldiers each nation should be allowed to maintain.

LAND FORCES DEFINED

The land armament is to be determined on the basis of actual military strength, rather than upon the potential power of a nation, is the substance of the agreement, which was qualified with many reservations. With aeronautics and interference with commercial aviation, the agreement provided that in limiting airplanes the method to be followed would be that of fixing the number of planes and the horsepower. In the case of dirigibles the number, horsepower and total volume would be limited.

In discussing the above points, it was pointed out that the object of the preparatory commission was simply the preparation of a draft treaty which should contain the principles and methods on which a reduction or limitation of armaments could be worked out for the various types of armament, the points on which agreement had been reached constituted definite steps toward a final international conference which should determine the exact statistics to fit into this framework.

Principal questions on which agreement could not be effected were naval limitation, the method of limiting a nation's total expenditures for national defense and a method of international supervision or control of such disarmament agreements as might be reached.

TWO TONNAGE PLANS

In the naval discussion, the main point at issue was that of whether a nation's naval strength should be limited by limiting its total naval tonnage or by limiting tonnage in its various types of naval craft.

One group, led by France, desires to allot each nation a certain gross tonnage. As long as a nation stayed within its treaty tonnage limitation, she would be permitted to build whatever type of craft she wished. The League of Nations, holding that the method followed at Washington is the best. There the principle of limiting naval tonnage by classes of ships was applied.

The question of League supervision of the terms of a disarmament treaty precipitated prolonged discussion. From the beginning the United States, through Minister Hugh Gibson, its chief spokesman, made it plain that this government would not consent to any kind of supervision or control, either by the League or any other international body.

The United States' position is that once an agreement is reached, compliance with its terms must be left to the honor of the individual nations. A plan under which the United States would not sign the supervisory sections of a treaty has been proposed.

Seattle Slayer Due for Noose Makes Escape

EVERETT (Wash.) May 1. (AP)—Edward C. Sickles of Seattle, under sentence of death for murder, escaped from the County Jail here early today.

The Board of County Commissioners offered a reward of \$500 for his capture, dead or alive. The desperado, 27 years of age, who was convicted here March 23, last, of slaying E. Brown, town marshal of Sultan, Wash., was aided from the outside in his break for liberty.

County officials believe Sickles, who took up the search were given "shoot-to-kill" orders. Sickles was to have been hanged at the State penitentiary in Walla Walla on Friday, the 15th inst.

DR. AARON SCHLOSS OF BERKELEY DIES

SAN FRANCISCO, May 1. (Exclusive)—Dr. Aaron Schloss, physician and club man, died yesterday at his Berkeley home following a recent operation. He leaves his widow, Mrs. Aaron Schloss, at one time state president of the California Federation of Women's Clubs.

Sales Manager Wanted in San Francisco

An old established Corporation of National prominence, one of America's leading industrial factors, will grant to a man of its choice a franchise of intrinsic value.

Our product is a vital apparel necessity and controlled by exclusive United States patent rights, is nationally advertised in leading magazines and newspapers throughout America. It is sold by modern methods that insure satisfied customers and a big repeat business, practically no competition.

The man to whom we grant this franchise will be over 28 years of age and married. He will possess a pleasing personality and an unquestionable character and be able to furnish bond at our expense. He will have a working capital of not less than \$6500.00, which amount will be used by him from time to time to finance actual orders as secured by his salespeople.

This is an unusual opportunity for a man of the right calibre to control a business of his own and who has been accustomed to earning over \$10,000 net yearly.

Write full details in letter about your experience, age, nationality, etc., and if possible send a small photograph. Applicants who qualify will be granted a personal interview by Home Office executive. Write DAG, Box 297, Times Office.

SUSPECT CAPTURED

Autremont, One of Gang Sought in Train
Robbers, Believed Prisoner in Philippines

(P)—May 1. (P)—Ray De Autremont, wanted in connection with the train hold-up and murder of October 11, 1925, and the robbery of the Philippine Islands, according to postoffice inspectors at Spokane, was captured today by the Philippine constabulary, who is visiting in that region, has been added to investigate the report. The person sought as De Autremont was said to be under the alias of John Wainwright.

Ray De Autremont, a brother, sought for almost two years in connection with the hold-up, was arrested here recently while serving as a soldier in the United States Army. He is now in Oregon awaiting trial and has denied any complicity in the train robbery in which several trainmen were killed.

DRAWN TO CALIFORNIA
EXETER (N. H.) May 1. (Exclusive)—Rev. Clarence V. Tenney, pastor of the Advent Church for the last three years, has resigned, to take effect August 15, next. He intends to take a trip to California, and preach the second coming of Christ while on the way. He says that the time is short and that there is more need of home mission work than for sign missions.

HIGH-SPEED JAZZ DANCES
GO ON LONDON BLACK LIST

LONDON, May 1. (P)—High speed jazz is on the black list in certain quarters. Dances have revolted against spooning at the rate of sixty to eighty beats a minute and have organized to reform matters more of their liking.

The "Ancient Order of Foxtrots" has been organized to combat it and several raids have already been made on cafes and dance halls where high speed musicians held sway. The "dancing delegates" behind the move for slower time adopted the usual tactic of the "walking delegates" and set forth their views in speech and song.

So popular is the order's slogan of "forty-eight beats to the minute" that the organization has been growing at the rate of more than 600 members a week.

The subscription is 5 shillings, of which 2 shillings 6 pence goes to charity.

News of a dance hall's "conversion" is quickly advertised among friends of the order.

SURVEY FOR STOCKTON HARBOR TO BEGIN SOON

STOCKTON, May 1. (Exclusive)—The first of the location surveys for the Stockton deep water channel and harbor project, are to begin within the next week or ten days. Maj. J. A. Dorst, army engineer from the office of District Engineer C. S. Ridley, San Francisco, arrived here today to take active charge of the work. The surveys, said Maj. Dorst, should be completed by October 1. The surveys are to be conducted by the city of Stockton, which has voted \$100,000 in bonds as its part of the cost of the project, but a Federal appropriation to match this sum will not become available until Congress meets for its December session. Completion of the surveys this year, will insure an early start on the construction stage of the project when Federal money is appropriated.

QUAKE STUDIES CONFIRMED

University of California Professor Announces
Results of Research Work

BERKELEY, May 1. (Exclusive)—Prof. Perry Byerly, earthquake specialist at the University of California, has completed an analysis which confirms theories about the earth's structure, at depths of 400 and 1700 kilometers. By analyzing a single earthquake, in a curved path. If the earth was one continuous mass throughout, it should be possible to compute the travel time fairly definitely. But as a matter of fact there are discontinuities in the computations which indicate discontinuities in the structure at various points, including those at 400 and 1700 kilometers below the surface. This fact has already been noted by a number of German scientists, and my work is confirmatory.

For the purpose of his study, Byerly chose the Montana shock of June 27, 1925, because of its favorable location in the approximate center of the large group of recording stations. Of his discoveries the scientist said:

WAVE PATHS
"Earthquake waves are the only things able to penetrate the earth to a considerable distance and return again to the surface. They are, therefore, one of the means we may employ to deduce hypothesis concerning the rigidity, compressibility and density of the earth."

"We know that the path of a wave through the earth is a curved rather than a straight line because the lower end of the wave front, like one flank of a line of skirmishers, moves faster than the upper or surface end, and consequently steadily changes the direction of the wave

GANG CHIEF ACCUSED OF DEATH PLOT

Slayer of Illinois Mayor
Says Gunman Hired Him
and Brother for Crime

BENTON (Ill.) May 1. (P)—Charles Birger, notorious Southern Illinois gangster, was directly charged with plotting the murder of Mayor Joe Adams of West City, a friend of the rival gangsters, in a confession by Harry Thompson, 19 years of age.

The youth declared Birger hired him and his brother, Elmo, 17, now dead, to kill Mayor Adams. He also charged that Birger and his associates were responsible for the dynamiting and firing of Shady Bent, Birger's roadhouse, the night of January 9, in which Elmo Thompson and Mr. and Mrs. Steve George were burned to death.

My brother, Elmo, and I killed Joe Adams, but Charles Birger made us do it," the youth asserted. "Birger promised us \$50 for every shot that hit Adams."

We each got \$25 after we killed him and Ray Hyland got \$50 for driving our car.

Circuit Judge Charles H. Miller interrupted the recital of how the Mayor was assassinated at the front door of his home last December 12, by saying:

"Why are you so insistent on pleading guilty of murder?"

"Because Charles Birger, Art Newman, Conkle Ritter and Freddie Wooten blew up Shady Bent cabin and killed my brother."

Thus it was that Thompson had come to the reformatory at Pontiac, where he was serving a sentence of from ten years to life for robbery, to have revenge.

RECOVER COLLECTION

Goethe's Black and White Drawings
Found by Relative in Trunk

BERLIN, May 1. (P)—Goethe's remarkable collection of his own eighty-eight black and white drawings and water colors, which the Goethe Museum at Weimar sought throughout Germany for twenty-five years, is now in the museum as a result of a curious coincidence.

The drawings, largely German and Bohemian landscapes, were known to have been possessed by Goethe in 1807 to Princess Caroline of Saxony-Weimar with a note reading: "This is how I would have my leisure moments during my travels of recent years."

The Princess willed the collection to her intimate friend, Christiana von Reitzenstein. Her descendants evidently thought as little of the drawings as did Goethe's greatest poet, who virtually apologized for dabbling in such foolishness.

A short time ago a distant relative of the von Reitzenstein family submitted the drawings to Prof. Hans Wahl, director of the Goethe Museum, who had been conducting the search, and asked if they were genuine. He said he found them in an old trunk of family relics. Dr. Wahl immediately recognized his long-sought prize and purchased it.

HIGH SCHOOL STRIKE IN WISCONSIN ENDED

SUPERIOR (Wis.) May 1. (P)—Superior's high school strike, which began April 1, last, ended yesterday after a conference with representatives of Miss Lulu Dickinson, whose dismissal as English instructor in Central High School brought about the strike. Student leaders issued a statement at Miss Dickinson's suggestion urging all strikers to return to school Monday, a citizens' committee joined with the students in urging Miss Dickinson's reinstatement, but the board refused to take her back this year. She may become eligible to resume her position next year.

HEIRS ADMONISHED ON LIQUOR BUSINESS

SPOKANE (Wash.) May 1. (P)—Jacob Goetz, who grubstaked the owner of the mule that discovered a mine and brought him a fortune, willed his hotel to his children, told them not to "put too much style" into it, and advised them never to engage in the liquor business. It was revealed here today that if prohibition should be abolished, do not go into the liquor business," the will admonished the two heirs, Harry Goetz of Spokane and Mrs. Helen Edmonds of Portland.

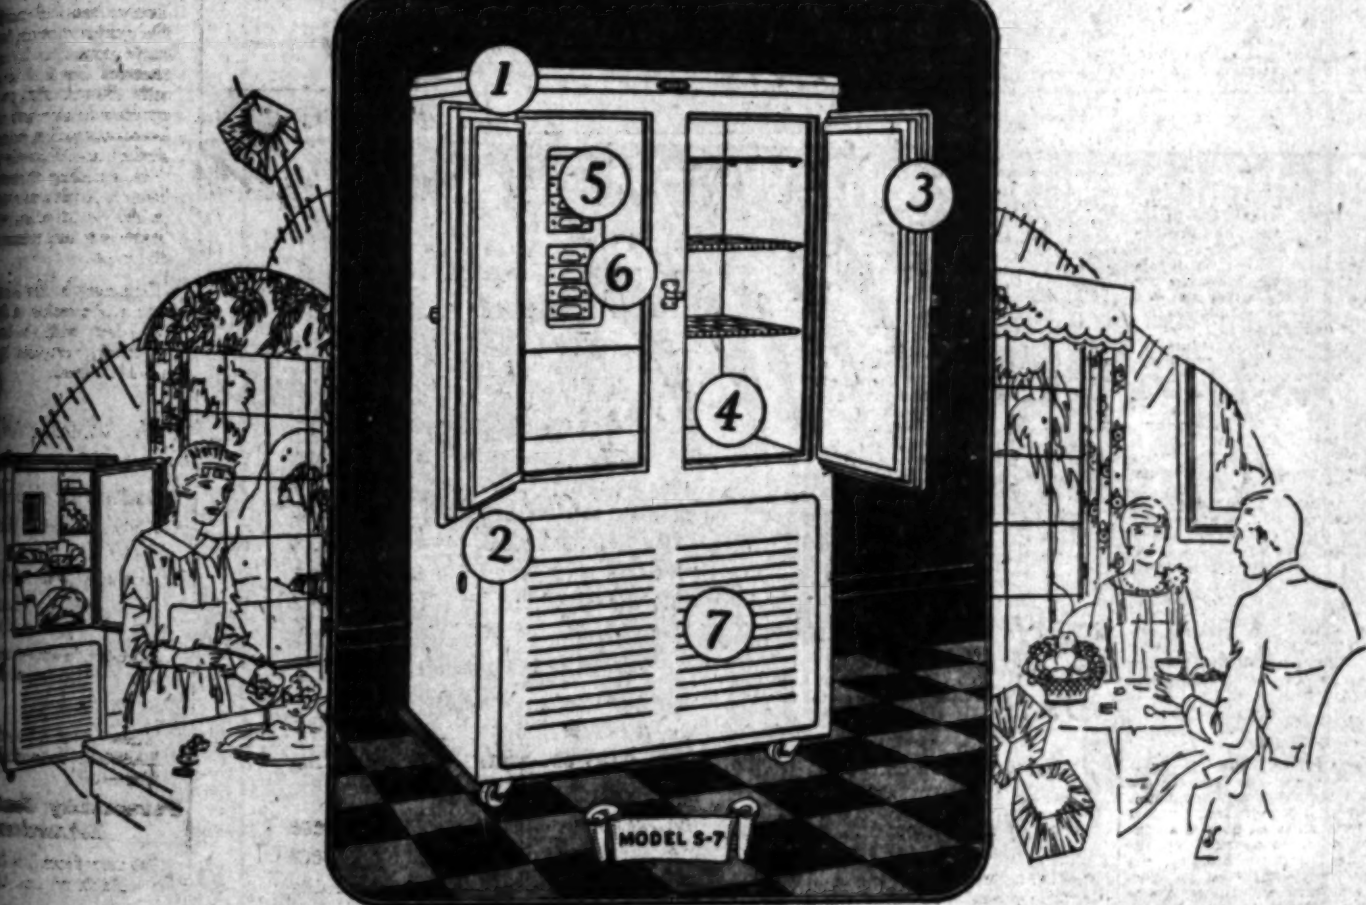

DISABLED FREIGHTER BREAKING UP IN SURF

SEATTLE, May 1. (P)—The disabled freighter Arvon went aground in a storm early today on the south shore of Whidbey Harbor on the Washington Coast, and late today was reported breaking up in the heavy surf and wind. The crew of ten of the 13-ton steamship, which was crippled Friday night when it struck a bar, was safely removed to the tug John Cuddey before the freighter went aground.

PRESIDENT OF ROTARY

You get *all* these important features when you choose the new Servel

Installed Complete in Your Home For a Small Down Payment—18 Months to Pay the Balance

- WHEN choosing your Electric Refrigerator, it will pay you to look beyond the obvious new conveniences it offers. Measure comparative values to find the utmost your money can buy in really dependable, economical, *lasting* service. Then you will realize the importance of all these Servel features.
1. *Advanced cabinet construction.* Heavy "Armco" rustproof steel, with a rigid frame of solid oak. Built for *lasting* service under all conditions.
 2. *Rounded corners and top beading.* Eliminating all metal strips. Giving more pleasing design and far easier to keep clean.
 3. *Better insulation.* Extra thick pressed cork-board, impregnated with hydroline. Covered with waterproof paper. All applied against the liner, leaving air space between insulation and exterior steel.
 4. *Porcelain liner.* Genuine porcelain fused on one-piece welded steel. Smooth round corners, no seams or bolt holes. Absolutely sanitary—easy to keep clean.
 5. *Improved chilling unit.* More convenient ice-cube trays—easier to handle—quick to freeze. Entire front panel and individual tray fronts of white porcelain.
 6. *The coldest refrigerator in household use.* A demonstration will prove its greater efficiency and economy of electric current in producing and maintaining Servel's steady dry cold.
 7. *The "Duplex" refrigerating machine.* Double compressor and double fan—even in the smallest Servel model. Built with precision and care to assure quiet, economical operation. Entirely automatic—with no delicate controls to get out of order.

SNYDER TRIAL
NEARING CRISISBoth Wife and Gray to Take
Stand This WeekEach Expected to Accuse
Other of MurderWoman Explains First Story
as Fear for Life

NEW YORK, May 1. (AP)—This week will see both defendants in the Snyder murder trial on the witness stand, each one pointing at the other and saying: "I am innocent, there is the murderer of Albert Snyder."

Mrs. Ruth Snyder, blond widow of the victim, took the stand Friday in an attempt to shift the blame for the killing of her husband from her own erect shoulders to the bowed back of her little cousin salesman, Henry Judd Gray.

When court adjourned for the week-end she had not completed her direct examination. She will be recalled as the first witness at the opening session of the trial's third week.

FEARED FOR LIFE

As soon as her own lawyer, Edgar F. Hamilton, has led her gently through her recital of what she asserts to be the true story of the crime, she will have to submit to the verbal attacks of the prosecution.

Mrs. Snyder has been released at last from this ordeal and character witnesses have testified to her standing in the community. She is expected to deny her story in every detail and tell it to point her as a "wicked woman," in whose tale he was a helpless puppet.

The story of Mrs. Snyder in brief was that Gray, for love of whom she had violated her marriage vows, conceived the idea of killing her husband to obtain insurance of which she was the beneficiary, and that he carried the plan to completion single-handed and over her strenuous objections.

She said she had to detective investigating the crime and told them that her husband had been killed by burglars because she was in "moral fear" of her lover, who had threatened to kill her if she did not protect him.

RECK FIRST BLOW

"I had seen him murder my husband," she cried in a harsh, hoarse, and I had every reason to believe that if I did not obey his commands he would finish me off, too."

How Gray may endure the ordeal of the witness stand, is a matter of wide conjecture. Since the trial began he has sat slumped in his seat, chin on hand and eyes riveted on the floor so that only his curly black hair was visible to the spectators.

His story, if from some hidden source he can command the energy to tell it, will be that the murder plan was entirely Mrs. Snyder's, that he was "put in a whirl" by her untimely love-making, and was forced against his will to be present when the crime was committed. He is expected to admit striking the first and almost harmless blow, but to swear that after that the murder was done, coldly, brutally and deliberately by Mrs. Snyder.

JILTED MAN SLAIN

Slain Slashed in Fight With Girl's
Husband in Chance Meeting

CHICAGO, May 1. (Reuter)—Joseph Garono, a young merchant who had made all arrangements to marry Mary McGill, 17 years of age, May 18, met her and Eugene d'Almeida, 27, a business man, on the street at midnight last night. Then he learned for the first time that they had eloped last Wednesday and were married.

"Meet my husband," said the young bride to Garono. The latter was accompanied by the girl's father, who, in a rage, ordered her to release the stranger's arm and go home.

Garono, in a rage leaped for the husband. The husband was down and being overpowered. He drew a long knife and made an upward sweep, cutting the throat of the jilted lover. Garono died on the way to a hospital.

FUND FOR MEMORIAL

San Antonio to See World Premiere
of War Picture, "Wings"

SAN ANTONIO (Tex.), April 30. (Reuter)—Proceeds of the world premiere here May 18, of "Wings," World War picture filmed by the Famous Players-Lasky Corporation here last fall, will go toward the fund being collected by the Second Division Association to erect a memorial to the more than 4000 men of that organization who lost their lives in France, according to Brig.-Gen. Paul R. Malone, commander of the Second Artillery Brigade, Fort Sam Houston.

It will be the first time a world premiere showing will be taken from the larger cities of the country, he said, and has been arranged, together with the monetary contribution, as a compliment to Gen. Malone, who was a technical director of the filming. Men of the Second Division participated in the picture and planes from local flying fields were used.

FIND ROMAN SWORDS

Excavation Work in Germany Un-
earths Ancient Weapons

BERLIN, April 30. (Reuter)—Traces of the ancient Roman settlements in Germany continue to be discovered. During excavation work near the Walchen Lake, in Southern Bavaria, valuable prehistoric bronze swords, hair ornaments and arrow heads, have been found under a great stone slab. They date from the so-called Hallstatt or Ch-Alpine period, 800 B.C. Near by a number of Roman silver coins were found, one bearing the bust of Emperor Marcus Aurelius.

Near Gerolstein, not far from Cologne, an earthship disclosed a number of plates and urns of black clay, as well as bronze needles and bronze coins, marking the site of a Roman burying ground. Similar Roman graves have also been found in the course of excavations near Mayen. The finds have been placed in the museum at Trier (Germany) and Mayen.

Manufacturers
Plan Campaign
for Full Vote

NEW YORK, May 1. (AP)—A campaign to mobilize the nation's industrial intelligence for its part in determining the 1928 Presidential election was announced tonight by John E. Edgerton, president of the National Association of Manufacturers.

Both major parties will be urged to give full consideration to fundamentals governing the course of national business, the manufacturer said, and a committee of 100 will draft a "platform of industry" to be presented to the manufacturers' national convention at Chattanooga, Tenn., October 25 to 27, after which organized effort will be directed toward getting voters to the polls.

"Our organization, employing approximately 8,000,000 persons, believes that its industrial experience can be of definite service to the men who conduct the business of the nation," Mr. Edgerton said.

During restoration work in a gallery in Vienna recently, a Van Dyke picture worth \$100,000 was found.

San Francisco
Clubwoman to
Go on Air Tour

SAN FRANCISCO, May 1. (AP)—The California Development Association announced today that Mrs. D. E. F. Easton, clubwoman, would participate in the State-wide four-day air tour to begin Tuesday in the interests of commercial aviation.

She will be in one of the planes in the fleet to start from San Francisco's new municipal airport and fly to Sacramento, Stockton, Fresno and Bakersfield.

FARMER KILLS FAMILY
AND SLASHES THROAT

BRUNSWICK (Mo.) May 1. (AP)—Slaying his wife and three children with a hammer today, Jett Johnson, a farmer of Dalton, Mo., then killed himself by cutting his throat with a razor.

Broken arms and bruises on Mrs. Johnson's body indicated that she had fought desperately to save her children.

BROKERS CENSURED

WASHINGTON, May 1. (AP)—The Federal Trade Commission has issued an order directing the Cigarette Tobacco Company and the Otto L. Kuehn Company, merchandise brokers of Milwaukee, and the Wisconsin Wholesale Grocers' Association to discontinue certain trade practices.

The commission declared the association held that the jobber was the best channel through which the manufacturer should distribute his products to the retailer and that consignment which did not pursue this practice was classified as "irregular." It also found that the two brokerage firms "by co-operating with the association in refusing to sell to irregulars" received the hearty support and business of the members of the association.

ECONOMIC PACT FORECAST
TEHRAN (Persia) May 1. (Reuter)—A secretary of the German Foreign Office is expected here soon to negotiate for a closer economic understanding between Persia and Germany. Persia will invite more German technical experts. Germany is the favored European country here.

Prince of Wales
Leaves Seville
for Mountains

SEVILLE (Spain) May 1. (AP)—The Prince of Wales, with his brother, Prince George, motored today to Granada to spend several days in the Sierra Nevada Mountains.

King Alfonso and Premier Gen. Primo De Rivera also left this city for Cadix to open a scientific congress and witness the launching of a ship.

Both British and Spanish royalties are to meet again at Cordoba on Tuesday night to entertain for Madrid.

ANGRY RAVEN ATTACKS FOX
During a fox hunt by the Ullswater Hounds on the steep slopes of Cross Fell, near Tonks, Eng., recently, a raven joined in the forces against the prey. Hunt followers through field glasses saw the bird flying above the animal, making swift swoops at its eyes, and heard it uttering hoarse croaks. The fox, dead beat, snuggled back savagely, but not until the pack came did the raven desert. Hounds caught the prey in a day ravine later.

American Ports
Show Material
Cargo Increase

WASHINGTON, May 1. (AP)—American ports handled 20 per cent greater cargoes in 1926 than in the preceding year when the previous high record was set, the Shipping Board announced today.

The total volume of water-borne foreign commerce in ports of this country last year exceeded 112,000,000 cargo tons. The export total was 58,100,000 tons, or 54.7 per cent greater than in 1925. Most of the increase consisted of coal shipments resulting from the British strike.

More than 44,000,000 tons were imported, an increase of 2 per cent over the previous year.

HOOPER TO BE AT RADIO MEET
It is understood that Secretary of Commerce Hoover will head the United States delegation to meet with representatives of foreign nations in Washington during the sessions of the international radio-telegraph convention, now scheduled to take place early in October.

LONDON GETS "ONCE OVER"

American Sightseers in Characteristic Hurry
Half Day to Seeing City, and Not That Much
if Guide Isn't Interesting

LONDON, May 1. (AP)—London was not built in a day, either. But it can be seen in half of one, if the streets aren't slippery, and there are no traffic jams or fog.

Americans in London are always in a hurry. Generally they are on their way from the continent to Southampton and the boat for home. They have a day in London. And in between the business of changing money, buying tickets and catching trunks, there are a few spare hours in which London must be seen.

Tourists do less justice to London than to any other city in Europe," said a local guide at a leading tourist agency.

The guides are wise as they seek to keep the tourist's interest by pointing out the status of Washington in front of the National Gallery, the church where William Penn was baptized, the house where Capt. John Smith was married to his Indian princess, the church where Dr. Charles Darwin preached before leaving for New York, and other points of interest.

But the yards have begun to be unfilled. The guides have reached the "end of the line" after weeks of nothing but the same old story of the death of the prince.

Another point of interest is the fact that the guides are now being paid by the hour, and back to the old story of the death of the prince.

A Competitor Indorses Brooks

It has never taken the Los Angeles public more than 1 month to call the turn

Los Angeles is famous for its response to "The New" and its welcome to the stranger. Nowhere in America are new ideas, new methods, new firms, more promptly welcomed and, if worthy, more frankly applauded. But the same generous public is quick to detect TRUTH—to sift merit from pretense, counterfeit from real, imitator from leader...and is then as stern a judge as it is fair a jury. Los Angeles, in short, is "quick to call the turn"...

Why do you take no recognition of the constant efforts to copy your stores, your suits, even your advertising?... a customer asked us last week. Well! The public has always answered our imitators before we were bad, time to think about it ourselves. In fact...

WE reproduce here a portion of an advertisement of one of the world's most men's clothiers recently appearing in the Los Angeles newspapers. We heartily indorse every word of it. In fact we accept it as a sincere indorsement of the Brooks policy—the Brooks organization—the Brooks Values and Brooks integrity.

BROOKS is not a new institution.

We Have Been in Business 5 Long Years

And we're growing every day.

Tens of thousands of men and women—look to BROOKS as standard by which VALUES in Clothes are gauged. The general public approval that we have made BROOKS

The Largest Exclusive \$25 Suit and Overcoat Firm in the World

BROOKS concentrates its entire energy on the tailoring and making of Suits and Overcoats at one price—\$25.00. Our interests are not divided into various price classes. Our factory with thousands of skilled workers are trained to turn out only the best work—not several grades. This is an important consideration to every customer of highest quality and utmost satisfaction.

There's No Closed Season on VALUES When You Buy Your Clothes at Brooks

EVERY day is open season on VALUES here. We never have a sale—we give you the advantage of our record turn-over with every garment you buy from us. When you buy a Brooks garment you know that...

\$25 is the lowest price at which a similar suit or overcoat will ever be sold for.

Smart Style
WITHIN 10 days after a new style makes its bow in New York, it is incorporated in the Brooks suits in Los Angeles. Our own designers, our own factory and no middle-men, make this possible.

Real Fit
EVERY Brooks Suit and Overcoat is hand draped and hand tailored. That's why they fit so perfectly. Any alterations required are made here in our own store by expert tailors and we make no charge for this service. We feel that a real fit is as much a part of your suit as the woollens themselves.

Perfect Service
A Suit or Overcoat, like a motor car, must have care to give maximum satisfaction. Careful pressing keeps a suit looking right. We keep Brooks Suits and Overcoats pressed for you FREE, and we even make minor repairs for you without charge.

Straw Hats \$2

—only \$2.00 and they are the greatest Straw Hat value ever offered. A tremendous purchase with ready cash secured them for us away under the market. Instead of pocketing this BUYER'S profit, we are passing it along to our customers in real BROOKS STYLE.

Caps \$1.50 • Flannel Trousers \$7.50

In Characteristic Hurry Death
Seeing City, and Not That Much
Guide Isn't Interesting

New York, and other points of view, are less American interest. In between, they are scattered remarks about St. Paul's Cathedral, the London Guildhall, and the story of the death of the young prince. They have arrived at the London. The guide makes a mighty effort. He becomes as he describes the "grandeur" of the many wives of Henry VIII were killed there, and the story of the death of the young prince. But the young prince has been gunned to be unfitted. The guide has reached the saturation point of his knowledge. Another point of view is that the guide will explode. The guide realizes this. He hustles them out again, and back they are to Piccadilly Circus.

FLOOD RAISES
COTTON PRICE

Prospect of Smaller Crop
Affects Market

Production Decrease in India
Also Large Factor

Mill Consumption Shows
Gain; Exports Increase

NEW YORK, May 1. (Exclusive)—The Mississippi flood situation has finally been recognized in the trade as such a serious factor in the new cotton-crop situation that little attention is now being paid in the trade to anything else. The area actually flooded and being menaced with flood on both sides of the Mississippi produced more than 1,000,000 bales of cotton in the past season's crop. This makes it look now as though the new crop will be so much shorter than the past season's record yield that it will have a potent influence in causing higher prices for cotton in the event of any bad weather developing. In other parts of the belt that would give the crops in those sections such a bad or late start that their prospective yields would be cut down.

Another important factor which has not yet been fully appreciated in the trade is that India's crop the past season has been officially estimated recently at 4,182,000 bales of the net weight of 478 pounds each, against last year's crop of 3,580,000 bales. This much shorter crop in India than last year's accounts for India's heavy purchases of our cotton to make up this deficiency.

Our total shipments to India so far approximate 283,000 bales, against nothing last year, and 268,000 to Russia, against 148,000 there last year, while Japan has taken 1,248,000, against 915,000 last year, and Italy 656,000, against 582,000.

EXPORTS GREAT
Shipments to Germany for the nine months' period are as high as 2,590,000 bales, against 1,594,000 last year; France 916,000, against 810,000; Denmark 254,000, against 184,000; China 229,000, against 74,000, and Great Britain 2,238,000, against 2,098,000 last year.

Our total exports from August 1, last, to date are now up to 9,821,000 bales, against 7,044,000 the same time last year, and 6,900,000 the whole of last year. Indications now are that the full year's exports will approximate 11,000,000 bales, against the previous high record of 10,000,000 of 1911-12. Also that the year's actual consumption by American mills will make the high record of 7,000,000 bales without limiters.

VERY LITTLE SPECULATION
The amount of the past season's record crop actually brought into sight from August 1, last, to date is 17,788,000 bales, against 15,295,000 the same time last year. Of this, world's spinners' takings are 14,294,000 bales, against 12,568,000 last year. These takings include the export clearances stated above. Present world's visible supply of American cotton in all positions is now down to 5,742,000 bales, against 5,942,000 last week and 5,862,000 a year ago.

TIPLERS DEFENDED
German Marine Commander Replies to Charge Against Army

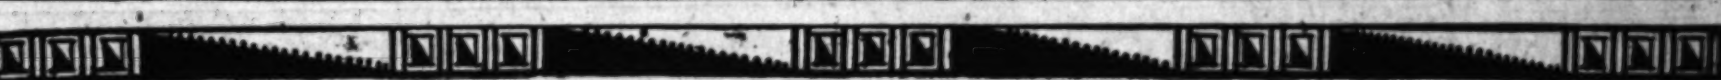

BERLIN, May 1. (AP)—Admiral Johannes von Schroeder, commander of the German marine corps during the World War, has replied "better a valiant booby than a craven traitor" to charges by a prominent prohibitionist that Germany lost the war because her armies were drunk when crucial offenses were undertaken. Admiral von Schroeder, who was nicknamed by Germans "The Lion of Flanders," is one of twenty-eight commanders of the German army and navy, including President von Hindenburg, who have collaborated in a book denouncing as treasonable false accusations by Prof. Hans Schmidt, prominent dry leader, that German soldiers imbibed so freely that they were unable to carry out orders.

WORLD FLYER TO AID
STOCKTON DEDICATION

STOCKTON, May 1. (Exclusive)—Lieut. Lowell Smith, commander of the American Round-the-World Flyers, will be invited by Lieut.-Col. Otto E. Sandman, chairman of the aeronautics committee of the Stockton municipal aviation field on May 7. Lieut. Smith will be one of the principal speakers at the Second Annual California Aeronautical Conference to be held in San Francisco, May 8. He will be asked to accompany the fifty flyers who will come to this city the following day to assist in dedicating the local airport.

NEW BUTTERMILK USE
MARBELLA, Spain, May 1. (Exclusive)—Nothing like a bit of good old-fashioned buttermilk at the proper time, believes Mike Jenner, who lives north of here. Jenner's automobile burst into flames while he was sleeping in the road. He took a can of buttermilk from the back of the car, used it as he would a fire extinguisher and continued on his way.

PICURE-ARROW reduces price as indicated on label.

Even Though You Buy on Credit Never Pay More than Cash Prices!

THERE is but one best way to buy anything, whether it be a home, a car, or furniture.... That is to pay cash for it. That way is best because the **CASH PRICE** is always the **LOWEST** price for which an article can be bought.

WHEN you buy furniture, think about that. Most of us cannot pay spot cash for the many important things needed in our homes. That is no reflection upon us. Neither should it expose us to the penalty of paying too much for what we buy merely to secure credit.

BUY from a store that prices its merchandise for cash selling, and yet is big and strong and responsible enough

to accommodate you with liberal credit terms at only a small fractional added cost as carrying charge, graduated in amount to the length of time and the size of the purchase. You then enjoy cash prices and pay only a nominal fee for extra accommodation. That accommodation cost is not buried or obscured or camouflaged by a smoke-screen of claims, such as, "no interest," or "no extras," or "no charge for credit."

SATISFY yourself that the price you pay is the cash price. Shop and be sure. Compare the merchandise and prices, and then buy from the store that you know is giving you greatest value for total dollars paid.

Remember you are buying furniture, not credit

BARKER BROS. invite,—in fact, urge you to compare their merchandise and their prices with any other store's. Increased volume has resulted in lower prices and reduced carrying charges at Barker Bros. Buy for cash if you prefer. But if monthly payments are more convenient the new, lowered carrying charge (added on the amount remaining, after deducting your down payment) is only one-half of one percent a month; thus, for 6 months, 3 percent on the unpaid balance only; for 8 months, 4 percent of the unpaid balance; for 10 months, 5 percent of the unpaid balance; for 12 months, 6 percent of the unpaid balance.

NEVER Pay More than CASH Prices Even Though You BUY on CREDIT!

WELLS HOLD UP AT SEAL BEACH

Reports Show 55,000 Barrels Produced Saturday

Pinching Brings Total Down From High Peak

Many More Expected to Be Brought in Soon

Production in the Seal Beach field was estimated Saturday at about 55,000 barrels per day, after mounting to a high 72,000 barrels a few days earlier. Completion of the Miller Oil Company's No. 1 well with an initial output of about 8,000 barrels per day, and the bringing in of two smaller wells with an aggregate output of about 3,000 barrels, by the California Petroleum Corporation, ran the output of the field up close to 60,000 barrels a day. The average output over the entire week was approximately 45,000 barrels, according to pipeline runs, which figured in the daily yield per well for the seven days ending Friday, but the actual output of the field on Saturday was 55,000 barrels, according to the most conservative figures available.

The production of the field was divided between Alamitos Heights at 30,000 barrels per day, and the original area of the field at nearly 25,000 barrels. The latter production is coming from thirteen different wells.

There are six producing operators in the field. Paul Getty heads the list with 6,000 barrels from three wells, with one well, generally regarded as the largest potential producer in the field, shut in because of lack of transportation facilities.

The Pan American has four wells making a combined flow of 7,700 barrels a day. The Miller Oil Company is producing 4,000 barrels, and the California Petroleum Corporation is getting 2,200 barrels from two wells. George F. Getty, Inc., is getting 2,000 barrels from one well. In addition to these producers there are about forty-five wells in the field below 4,500 feet, either standing idle, ready to make a start, or waiting for a good place to set a water string. The Marland Oil Company has five wells cased, of which two are preparing to go on production.

TREK TO NEW GOLD FIND UNDIMINISHED

TUMA (Ariz.) May 1. (Exclusive) Scores of automobiles have carried prospective parties during the last week to the new McDowell find at Tuma, where the desert range again are being combed for indications of ore. Samples from McDowell's ledge have been secured in good places to set a water string. The Marland Oil Company has five wells cased, of which two are preparing to go on production.

CHLORIDE MINE CUTS RICH VEIN

Seven-Foot Body Struck by Operators After Year of Patient Work

CHLORIDE (Ariz.) May 1. (Exclusive)—Green Brothers & Larson, at 800 feet from a tunnel portal, have cut seven feet of ore desired to sample eighty-eight ounces silver, 94 gold and 4 per cent copper. The operators have been pushing their work for a year, passing through several small veins, bent upon a point of cross-cutting, just reached. This intersection is well defined on the surface.

Fifty tons of solid galena ore have been run in the Chloride mine from a four-foot vein recently opened by R. B. Neal on his mine near the Minnesota-Connor. In addition to the lead, the ore contains good silver values.

Some difficulty is being experienced with the water supply of the Chloride mill, but operations now are continuous, with water piped from the Mollie Gibson. Ore is coming mainly from company workings at 700 feet of depth, where a cross-vein has enlarged and enriched the vein of milling material, now seven feet in width.

Kern Victor in First Round of Oil-Tax Fight

BAKERSFIELD, May 1. (Exclusive) Kern county has won the first important skirmish in another oil-tax suit filed for the refunding of taxes to the North American Oil Consolidated, according to word received here from Judge William D. Deby of Inyo county, who sustained Kern county's contention to the complaint of the oil company against the county.

The oil company sued Kern county for the collection of taxes on the theory that the taxes were levied against land leased from the government. The tax was levied for road improvement district. The oil company contended that the county had no right to tax the land for improvements or building of roads. Mr. McGinn says that the oil company has the right to appeal its complaint if it sees fit to do so.

Vein in Copper Basin Property to be Developed

PRESCOTT (Ariz.) May 1. (Exclusive)—Development on the Boston Arizona property in Copper Basin district, west of this point, is reported to have demonstrated the presence of a vein of pyrite ore, twenty to two feet wide, carrying gold, silver, zinc and lead. George E. Beht, manager, has gone east to purchase new surface equipment, including a large compressor which will be used to blow the ore to the surface. The company is bettering its road to the shipping point, Skull Valley Station on the Santa Fe.

Eight New Oil Wells Started in Kern Fields

BAKERSFIELD, May 1. (Exclusive) During the past week eight new wells were started in Kern county, four of them being in the Kern River field. The Standard Oil Company started four, two being on Sec. 18, 28-27 in the Kern River field, another on Sec. 27, 28-27 in the same district, and the fourth on the Elk Hills on Sec. 31, 30-25.

COAL FIND SECRET

Mexico Prospectors Refuse to Give Location of Deposits

TORREON (Mex.) May 1. (Exclusive)—Prospectors who are displaying samples of coal here assert that they have discovered deposits of it in the State of Durango within fifty miles of this city. They refuse to divulge the exact location but are attempting to obtain sufficient capital to make legal filings.

Geologists have expressed the opinion that oil and coal exist in sections along the Nansa River west of here. Several unsuccessful attempts have been made to raise money for exploratory work. The samples of coal shown by prospectors have revived interest and it is probable that investigations will be made.

SEVENTEEN BANDINI FLUKES Operators Spend Millions Seeking Extension of Springs Pool; Latest Hope Goes Glimmering

BY HOWARD C. KEGLEY

Some idea of the amount of good money that is spent by big operating companies in search of new oil fields may be gathered from the fact that the seventeenth unproductive wildcat hole has just been abandoned in the Bandini district, and that the approximate cost of drilling this group of "dusters" is estimated to have been \$3,400,000.

The hole, which has just been abandoned is the No. 1 of the Petroleum Securities Company. It went down about 5,500 feet and got practically nothing in the way of showings. Field reports are to the effect that the best showings ever obtained in that district were probably those in one of the Oakridge Oil Company's wildcats, where there was considerable oil sand, but so much water that it could not be shut off, it is said.

For nearly four years the big oil companies of Southern California have been endeavoring to discover a northwest extension of the Santa Fe Springs field, somewhere between that field and the Kern River and Bandini fields. During that time the company has drilled four wildcat wells. Superior Oil Company has drilled two, Oakridge Oil Company has drilled one, and Bandini Petroleum Company has drilled one. Standard Oil of California has drilled two and Petroleum Securities Company has drilled one.

The district has been rather thoroughly searched by the drill, and most of the tests have gone down sufficiently deep to determine that there was no oil to be had. Oakridge appeared to be on something at one time, but it is believed to have been an exceedingly wet edge of Santa Fe Springs.

Many oil operators argue that there should be an extension of the Santa Fe Springs field, and at least eight companies have spent their good money in search of it. Many of them are now showing signs of wear, and there is a feeling that there is no more to be had in the northwest, and it seems quite unlikely that any more holes will be drilled in that direction, owing to the fact that conservative estimates place the probable cost of a hole at \$500,000. The procedure is exceedingly expensive because of extensive casing all the way down to the bottom of the hole.

ACTIVITY AT BIG JIM ON HIGH SPEED

Three Shifts Operating Mill; Machinery for New Unit Now on Ground

PATAGONIA (Ariz.) May 1. (Exclusive)—Machinery has arrived for a new unit of the Big Jim mill, for doubling the present output of concentrates. The mill now is running three shifts a day and shipping concentrates to El Paso at the rate of about five carloads a month. Concentrating to the ore is nearly completed on the 380 level, at a distance of about eighty feet from the bottom of the shaft.

The main shaft of the French mine, 700 feet deep, is being re-equipped, and it is expected that the old property soon again will be a producer. It was owned for years by the Hearst-Twelve Interests and later by Charles Clark of Los Angeles. It recently was purchased from Mrs. John Hey of Noyales by the Big Jim Company, which took four of the five claims, the fifth, the French, purchased by the Gold Coast Mining Company, Los Angeles. The two companies are joining in the new development. Ore from an old dump at the French shaft has been run through the Big Jim mill and has averaged 817.

LEASING REPORTED

HOME GARDENS DISTRICT FIELD OF NEW GROUP ACTIVITY

HOME GARDENS, May 1. (Exclusive)—Drilling for oil may become one of the chief activities in this section again during the present year. A number of residents of Huntington Park, Walnut Park, Bell and South Gate have formed a company, and now have under lease eighteen hole which may be drilled for oil. This property is within 700 feet of the Magnolia-Twenty Syndicate's Well No. 1.

G. D. King, rector of South Gate, and Don Solgore, connected with the Walnut Park National Bank, have been named as trustees for the new organization. They will make all arrangements either for drilling or for leasing.

GASOLINE PRICE COMPARISON DOUBTLESS STIRS GRATITUDE OF CALIFORNIA MOTORISTS

California motorists who enjoy the best roads and the cheapest gasoline in the world will probably feel grateful for these blessings when they learn that in Durban, British South Africa, the roads are bad and the service station charges 96 cents a gallon for gasoline.

One reason why gasoline costs so much in Africa is that the motorists are a long way from oil production, but what can be said concerning the price of gasoline in Mexico?

Vast quantities of crude oil are produced in Mexico and not a great distance away from the city. But the consumers there must pay the price of the refiners in the United States and add the freight rates there. This runs the cost per gallon up to 26 cents.

A similar condition seems to exist in Bogota, Colombia, where the price of gasoline is quoted at 75 cents. Colombia has great oil fields, although they are only partially developed.

In countries where there is no crude oil production the price of gasoline may run high with the excuse of transportation costs, import duties, excise taxes, distribution and marketing costs, quality of gasoline and other causes.

At Bucharest, Rumania, the price quoted is 15 cents, while in Athens the price is 42 cents a gallon. In this there seems an inequality that could only be accounted for by excessive taxes and freight rates.

The people of the United States, except in the mountain regions, are exceptionally favored by reasonable prices for gasoline. Production costs are low and quantity output is large.

SEARCH FOR NEW FIELD INDICATED

Extension of Kern West Front to Elbe Well at Edison in Prospect

EDISON, May 1. (Exclusive)—Plans to test for oil in an area extending from the west front of the Kern River field, eastward to the Elbe Oil Company's discovery north of Edison, are seen in a series of drilling and leasing agreements covering 1240 acres in four sections, which have been filed for record here by a representative of Dr. W. H. Vetter, lease holder in the Edison field. Nine separate parcels of land, scattered in a zigzag line across the potential field, are involved in the agreements.

Many of the holdings are covered by government prospecting permits and it is reported that filing of the drilling and assignment agreements are indications of plans for early development, which may prove that part of the area is oil bearing. Hundreds of acres adjoining the acreage named in the agreements are held in the hands of the Edison Oil Company, who will watch with interest development of the vast area north of this city.

ELBE OIL TO DRILL FOUR NEW WELLS

Success of First Round Mountain Project Spurs Greater Activity

BAKERSFIELD, May 1. (Exclusive) Development of the Round Mountain oil field established by the L. S. Barnes wildcat discovery of high gravity oil on Sec. 20, 28-29, nine miles north of Edison, will be immediate, it is thought by men in Bakersfield, in view of the independent producer's plans to drill four new wells on Sec. 20, 29 and 18 in that area.

The president of the Elbe Oil Company, drilling the discovery well, announces that as soon as the No. 1 well is tested for production, two more drilling outfits will be put in to make a thorough test of the oil zone. Mr. Barnes expects to be able to drill to the top sands in eight days and finish each well in thirty days.

Production in the new wells will lead, it is believed, to the drilling of offset wells by the Shell Company, Macfarlane Oil Company, and Chandler-Candfield Midway Oil Company, which hold leases in the vicinity.

Screen casing was set in the Barnes No. 1 well Friday, and preparations are being made to test production early this week. Officials of Elbe Oil Company are erecting a 5,000-barrel storage tank to receive the well's output.

In the area of miles south of Round Mountain where the Elbe well was brought in, L. C. Osborn has taken an option to acquire a government drilling permit from C. D. Harvey, F. E. Eastburn and Est. O. Boyle. Seven thousand two hundred dollars bonus is to be paid. The holding of the permit is to be for the north half of the south half and the southeast quarter of Sec. 24, 28-29, and the northeast quarter of Sec. 3, 28-29.

First Oil Well in Gila Valley Starts Shortly

SAFFORD (Ariz.) May 1. (Exclusive)—This week is to be spudded in the first oil well to be drilled in the Gila Valley, at a point near Pima.

Announcement is made that drilling is to be started soon on a second location near Ashurst. Both syndicates are represented by William J. Vaughan of New York and Carl A. Fuller of Chicago. The capital will be furnished entirely in the East and no stock will be offered for sale. Still another well is to be drilled in the Boyle district, twelve miles from the first well, which is being leased by the Whitlock Oil Company, a Tucson corporation, headed by F. F. Peard.

WILL EXPLORE MINE

CASA GRANDE COMPANY Preparing to Develop Property

CASA GRANDE (Ariz.) May 1. (Exclusive)—On Little Pico Peak, the smaller of two large black peaks through which the Southern Pacific main line runs, southeast of this point, a Casa Grande company is preparing for thorough exploration of a mine that has been operated for several years by G. F. Delgado.

The operator last year shipped five carloads of copper ore to the Hayden smelter. The mine is only a short distance from the railroad to which it is to be transported for shipment.

OIL SHIPMENTS SHOW INCREASE

Exports Gain 300,000 Barrels in Week

Thirty-six Tankers Required for Trade

Pacific Market Takes Bulk of Petroleum

Bulk petroleum exports from Los Angeles Harbor last week showed a gain of nearly 300,000 barrels over the combined shipments of the previous week, the total being 1,180,263 barrels, against 1,880,783 barrels during the previous week. Last week's shipments were taken by thirty-six tankers. Pacific domestic trade took 865,281 barrels, including 448,731 barrels of crude, 209,000 barrels of fuel, 120,148 barrels of gas and 86,484 barrels of diesel. The Pacific foreign trade took 314,982 barrels, including 50,000 barrels of crude, 104,000 barrels of fuel and 10,974 barrels of gas.

The Atlantic domestic trade called for 684,862 barrels, embracing 175,019 barrels of fuel, 253,191 barrels of oil and 197,788 barrels of gas. The Atlantic foreign trade called for 203,061 barrels of fuel and 47,000 barrels of gas. The shipments for the week were as follows:

PACIFIC DOMESTIC

Crude oil, 448,731 barrels of oil for General Petroleum Corporation, 100,000 barrels for Standard Oil Company, 100,000 barrels for California Petroleum Corporation, 100,000 barrels for Union Oil Company, 100,000 barrels for Shell Company, 100,000 barrels for Macfarlane Oil Company, 100,000 barrels for Chandler-Candfield Midway Oil Company, 100,000 barrels for Superior Oil Company, 100,000 barrels for Oakridge Oil Company, 100,000 barrels for Bandini Petroleum Company, 100,000 barrels for Standard Oil of California, 100,000 barrels for Petroleum Securities Company.

MINE MILL TO RESUME OPERATIONS

New Well and Pipe Line Assure Plenty of Water for Tonopah-Belmont

WICKENBURG (Ariz.) May 1. (Exclusive)—Operations at the Tonopah-Belmont mill, with ample water supply of water from a new well and completion of a five-mile pipe line. The company has completed its shaft to the 600 level. South Belmont is a prospect at 225 feet depth is reported to have cut a seventeen-foot vein, carrying gold, silver and lead.

Dr. W. H. Vetter has transferred the Wonder group of seven claims to the Arizona Associated Mines Company, of which he is president. The claims property is being developed, under option, by John A. Hensell of Los Angeles and J. B. Eastburn of Huntington Park, Ariz. Superintendent, reports betterment of lead, copper and gold values in the Wonder group.

PROJECT OF HOGBACK OIL PROGRESSES

Good Showing Reported at Depth of 1500 Feet by Jerome Operator

HOLBROOK (Ariz.) May 1. (Exclusive)—Tom Smart, of Jerome, at the head of the Hogback Oil Company, states that the Hogback well, north of Lupton, Arizona, is down 1500 feet with very good oil showing. The formation now is red sandstone of a very hard nature. Casing has been diminished to eight inches.

The Paramount Company, recently organized by Tom Smart and others in Phoenix, has a rig ready for drilling at a point eighty-five miles east of Gallup, N. M., and thirty-five miles north of the railroad, in the Seven Lakes oil field. Oil has been developed already in this locality at relatively a shallow depth. It is of paraffine base, declared fine for lubrication, and slow in gasoline. Mr. Lockhart has a rig ready for drilling at a point eighty-five miles east of Gallup, N. M., and thirty-five miles north of the railroad, in the Seven Lakes oil field. Oil has been developed already in this locality at relatively a shallow depth. It is of paraffine base, declared fine for lubrication, and slow in gasoline. Mr. Lockhart has a rig ready for drilling at a point eighty-five miles east of Gallup, N. M., and thirty-five miles north of the railroad, in the Seven Lakes oil field. Oil has been developed already in this locality at relatively a shallow depth. It is of paraffine base, declared fine for lubrication, and slow in gasoline. Mr. Lockhart has a rig ready for drilling at a point eighty-five miles east of Gallup, N. M., and thirty-five miles north of the railroad, in the Seven Lakes oil field. Oil has been developed already in this locality at relatively a shallow depth. It is of paraffine base, declared fine for lubrication, and slow in gasoline. Mr. Lockhart has a rig ready for drilling at a point eighty-five miles east of Gallup, N. M., and thirty-five miles north of the railroad, in the Seven Lakes oil field. Oil has been developed already in this locality at relatively a shallow depth. It is of paraffine base, declared fine for lubrication, and slow in gasoline. Mr. Lockhart has a rig ready for drilling at a point eighty-five miles east of Gallup, N. M., and thirty-five miles north of the railroad, in the Seven Lakes oil field. Oil has been developed already in this locality at relatively a shallow depth. Last-Minute News From Petroleum Fields and Marts of Trade

APACHE ENTERS
LEA-EDDY FIELDLocal Company to Complete
Shut Down ProjectPromising Test on Extension
of Maljamar AreaRig of Inglesfield and Bridges
Destroyed by FireARTESIA (N. M.) May 1. (Ex-
clusive)—Another Los Angeles company

to enter southeastern New Mexico is

the Apache Oil Company, which re-

cently organized in that city for \$500,-

000, which is to be expended in ex-

ploration work in Lea and Eddy coun-

ties. This company will complete

the No. 1 well of Bruce Sullivan on

the Loderick permit, Sec. 1, 18-31.

The well has been shut down for

the past several months at 2600 feet.

It is located four miles southwest of

the Maljamar discovery well.

Another Los Angeles company which

gives evidence of making a commercial

producer in the Henderson, Des-

ert and Blair No. 1 on the Wyatt per-

mit, Sec. 34, 17-43. It is standing

1500 feet in fluid on the eight and

one-quarter-inch hole, this coming

from a sandy lime topped at 4632

feet.

The well when completed will mark

an extension of the Maljamar field,

it being about seven miles southeast

of the discovery well and a like dis-

tance southwest of the Inglesfield and

Bridges No. 1, which recently proved

the cap rock area.

The Wyatt No. 1 was drilled as a

joint venture with the Texas com-

pany to a depth of 4500 feet, at

which level the Texas company re-

ported that the well had little chance

of making a producer. A division

was then made of the acreage, with

Henderson, Desart and Blair now own-

ing the well and approximately 25,-

000 acres.

Drilling is going ahead steadily on

the Cap Rock Oil and Gas Corpora-

tion's Leonard and Levers No. 1 on Sec.

11, 11-34. The well is drilling in

lime at 2715 feet.

While the hole was being drilled,

Saturator, friction of a hole tests

started at which tests showed the

rig of the Inglesfield and Bridges

No. 1 well on the Cap Rock, Sec.

4, 17-43. At the time of the fire

there were 4500 feet of oil standing

MEXICAN LINE
TO OPEN MINES

New Railway to Guadalajara

Improves Industry

Taps Area Rich in Mineral

Producing Properties

Silver and Gold Output to

Show Greater Yield

GUADALAJARA (Mex.) May 1. (Ex-
clusive)—Through trains are now op-

erating over the Southern Pacific

Line and the National Railway of

Mexico from the Mexican border

at Nogales, Ariz., to Mexico City

via Guadalajara. Despite the fre-

quent political upheavals and re-

volutionary disturbances in this part

of the republic there is a noted im-

provement in general commerce since

the gap between Tepic and La Que-

sada has been closed and through-

train service is enjoyed.

Freight and passenger service can

now be had from Vancouver to the

City of Mexico, with no interrup-

tion, especially as the farmers and

miners in this portion of Mexico to

be benefited by the new railroad.

Palm products can be sent to Mex-

ico City and intermediate points

without delay and the early spring

vegetables, raised in abundance along

the western slope, can be imported

to many parts of the United States.

MINING REVIVED

Mines which have heretofore been

idle on account of the lack of capital

and facilities will be able to op-

erate. Some valuable timber lands

will also be brought within a more

convenient distance to the rail-

road, and new lumber industries will

soon spring up.

The Secretary of Industry and

Commerce is making an effort to

revive the mining industry in the

State of Sonora which is to be great-

ly benefited. This State embraces

a number of rich mining regions

which have only been slightly de-

veloped due to lack of capital and

railroad facilities. The principal

mines are owned and operated by

Americans or American companies.

During the year 1926 the silver pro-

duction amounted to nearly \$2,500,-

000 and the gold about \$1,500,000.

OIL OFFICE BUILDING LOOMS

Movement Launched for Erection in Business District

of an Exclusive Structure for Industry

The Chamber of Mines and Oil has under consideration the matter of

erecting a Class A office building in the business district of Los Angeles

for the exclusive use of oil companies and persons directly interested in

the oil business.

Officers and directors of the cham-

ber have given the matter consider-

able consideration, and Edwin Hig-

gins, secretary of the chamber, has

just sent out a questionnaire to

obtain the sentiment of oil com-

panies, geologists and men, etc., in

regard to the feasibility of the propo-

sition.

If such a building is erected, Sec-

retary Higgins indicated, it will prob-

ably be in the area bounded by sev-

eral streets, including Broadway

and Figueroa streets. Persons inter-

ested are being asked to offer sug-

gestions as to the best possible loca-

tion.

Chamber directors are informed

that such a building will be built

and dedicated to the entire use of

the oil industry if leases can be

made to cover 50 per cent of the

available floor space. The chamber

thinks that considerable reduction in

rent can be enjoyed by some of the

branches of the industry, through

participation in such a movement.

It is calculated that such a build-

ing could be made to house the

Chamber of Mines and Oil, in ad-

dition to the headquarters of geolo-

gists, engineers, supply companies,

attorneys, etc. Secretary Higgins re-

turned from a visit to the com-

pany's holdings in which a great deal

of interest is being taken at the

present time by local as well as by

Los Angeles mining operators.

Three leases, the Spring-Mul-

coy, Borden, Edwards, Smith and

Blair, and Childers, Blach and Pal-

mer, have been secured on the

Electric mine at Weepah. The blocks

are located near the rich Horton-

Traylor showing, and are on the

Spring-Mulcoy lease above value

exceeding \$1000 per ton in gold, with

the vein three to five feet wide.

REPORT OF ORE
FIND VERIFIED

West End Extension Opens

Up Remarkable Ledge

Company Acquires White

Rock Claims at Weepah

Nevada-California Metals to

Open Nyla Mines

TONOPAH (Nev.) May 1. (Ex-
clusive)—Development of a remarkable

ore body on the 800 and 900-foot lev-

els of the West End Extension mine

has been officially verified. The ledge

shows a width of ten to twelve feet

of 850 silver-gold ore, following open-

ing of mill ore for 280 feet. Narrow

shoots are said to run from \$100 to

\$700 per ton.

Drilling is proceeding from the

1000-foot level in a full face of

quartz. The company is shipping

thirty tons of ore daily. It recently

acquired the White Rock group of

three claims at Weepah. The corpo-

ration is a subsidiary of the West End

Consolidated Mines Company.

Three leases, the Spring-Mul-

coy, Borden, Edwards, Smith and

Blair, and Childers, Blach and Pal-

mer, have been secured on the

Electric mine at Weepah. The blocks

are located near the rich Horton-

Traylor showing, and are on the

Spring-Mulcoy lease above value

exceeding \$1000 per ton in gold, with

the vein three to five feet wide.

The three strikes were made at

depths varying from surface to thirty

feet. The Electric Company is

trenching along the strike of the

rich deposit, and preparing work on

the 100-foot level, with profitable ore

showing in the two cross-cuts.

Controlled by Judge Paul C. Thorne,

Capt. Walter Brown, Edward Nolan,

Fred Hume and other Los Angeles

capitalists, the Nevada-California

Metals Corporation is arranging for

extensive development of gold prop-

erties recently acquired at Nyla.

The Nyla group is said to con-

tain ore reserves valued at \$1,000,000

with the vein exposed in the main

tunnel averaging around 800 per ton.

A four-foot compressor and other

equipment have been ordered and

early building of a mill is con-

COMPLETION
OF GUSHERS
SPURS HUNT

Huasteca Finishes Second

30,000-Barrel Project in

New Salinas Field

TAMICO (Mex.) May 1. (Ex-
clusive)—The new Salinas field proved

itself the new big field of Mexico last

week when the Huasteca Petroleum

Company brought in a 30,000-barrel

gusher, the second of that size in the

field within two weeks. It also com-

pleted a 10,000-barrel well. All the

companies are making a rush to

Salinas. It is expected to prove the

biggest field opened up since Can-

field.

Two wells were completed in the

southern end, or highland district.

They were a 300-barrel well for the

Huasteca in Tierra Blanca and a 700-

barrel well for the Mexican Gulf in

Amatlan.

Other wells completed last week

were a 2500-barrel well for the Mex-

ican Petroleum Company in Chidol,

a 300-barrel well for the International

in Corcoran; a 1000-barrel well for

the Imperial in Queretaro; a 500-

barrel well for the Corona in Corco-

vado; a 500-barrel well for the Mex-

ican Petroleum Company in Chidol; a

500-barrel well for the Corona in Cor-

covado; a 500-barrel well for the Mex-

ican Petroleum Company in Chidol; a

500-barrel well for the Corona in Cor-

covado; a 500-barrel well for the Mex-

ican Petroleum Company in Chidol; a

500-barrel well for the Corona in Cor-

covado; a 500-barrel well for the Mex-

ican Petroleum Company in Chidol; a

500-barrel well for the Corona in Cor-

covado; a 500-barrel well for the Mex-

ican Petroleum Company in Chidol; a

500-barrel well for the Corona in Cor-

covado; a 500-barrel well for the Mex-

ican Petroleum Company in Chidol; a

500-barrel well for the Corona in Cor-

covado; a 500-barrel well for the Mex-

Sparkling spirits

People are enthusiastic about ENO because they find some of its delightful qualities gets into their own system after a drink of it.

When you feel dull, have a sluggish intestinal tract, or are to blame. At such times there's nothing like ENO's fruit salt as a laxative. It is at once refreshing and thorough (not at all "sluggish") and as a drink is cooling and delightful.

Get a bottle of ENO's fruit salt. Try a dash in water before you go to bed tonight. In the morning when you wake, find the system gives to sparkling spirits. ENO has been world-famous for more than a half century. At all drug stores—two for 75c and \$1.25.

NEW MEASURES AND LAND RIGHTS

Protection Given to Property Owners

Facilitate Handling Public Improvements

Explains Some of Recent Legislation

When the legislature meets in 1927 session, the Assembly will be faced with the problem of land rights. The committee on land rights, headed by Mr. [Name], has been studying the problem for some time. It has held many public hearings and has received many suggestions from property owners. The committee has now prepared a bill which will give property owners more protection in the handling of public improvements. The bill will require the city or county to give notice to the property owner before any improvement is made. It will also give the property owner the right to be heard before the improvement is made. The bill is expected to pass the legislature in 1927.

NEW ACT IMPROVED

Assembly Bill 1111, which amends the Improvement Act of 1911, was passed by the legislature in 1926. The bill was designed to give property owners more protection in the handling of public improvements. It required the city or county to give notice to the property owner before any improvement is made. It also gave the property owner the right to be heard before the improvement is made. The bill was expected to pass the legislature in 1927.

NEW CLIFF DWELLING RELICS

Tablets May Have Been Newspapers

When the weary cliff-dweller returned to his flat at evening, he found a tablet of stone or bone lying on the floor. He picked it up and looked at it with interest. It was a tablet of stone or bone, and it had some writing on it. The writing was in a script that was unknown to him. He was a cliff-dweller, and he had been living in his flat for many years. He had never seen a tablet like this before. He was curious to know what it was. He decided to take it to the city and show it to the people there. He thought they might be able to tell him what it was.

NEW LINER WILL HAVE GOOD CARE

City of Honolulu's Staff of Engineers Have Held Many Important Posts

Engineering talent galore will handle the power plant of the new liner. The city of Honolulu has a staff of engineers who have held many important posts. They are experts in their field and have been responsible for many of the city's most important engineering projects. The new liner will be a great asset to the city, and the staff of engineers will be responsible for its operation.

Engineer Takes Flood Control Board Position

D. C. Henry, civil engineer of Portland, Ore., has accepted appointment as a member of the board of engineers of the Los Angeles Flood Control District. He was announced yesterday by Superintendent Graves, in charge of flood-control work.

Autoists Fill Tanks in Fear of Higher Cost

Los Angeles motorists continued to enjoy cheap mileage yesterday despite persistent rumors emanating from San Francisco to the effect that the gas war is on its last legs.

CANADIAN DANCE TOMORROW

The Canadian Society of Southern California will conduct a dancing party and reunion at the Hollywood Hotel, 1549 Vine street, tomorrow evening.

YESTERDAY! THE ROMANCE OF SOUTHERN CALIFORNIA - TODAY!

Avalon

FOR more than thirty years a trip to Southern California without visiting Catalina Island has been regarded as ham without the eggs. For a tourist to miss the magic isle has been one of the great regrets of his trip. In 1890, however, the attractions were limited mostly to the ocean voyage. When the traveler arrived at Avalon he was greeted by one or two frame buildings and a row of tents for the use of the vacationists. Today, however, well-appointed hotels, a golf course and other modern necessities for an enjoyable vacation await the visitor. (Photographs through courtesy Security Trust & Savings Bank.)

DEMONSTRATION PARADERS HELD

Protests on Sacco-Vanzetti Sentence Cause Arrests

Twenty-eight Charged With Marching Minus Permit

Women Storm Police Station to Rescue Children

An automobile parade which the banners declared was arranged by the United Front May Day Campaign to protest the execution of Sacco and Vanzetti, convicted of murder in Massachusetts, was broken up yesterday when a squad of policemen arrested the drivers of twenty-eight machines. The drivers were all booked at the City Jail on charges of parading without licenses from the Police Commission. In conjunction with the parade, the demonstrators held a picnic at Plummer's Park.

FEARED DEMONSTRATION

Demonstrations were feared at the park yesterday because of the arrest of the drivers of the machines which took part in the parade. The demonstrators were all booked at the City Jail on charges of parading without licenses from the Police Commission. In conjunction with the parade, the demonstrators held a picnic at Plummer's Park.

THE "BOYS" BRIGADE

When I was a youngster the Boy Scouts were not in existence, but we had the Boys' Brigade—a military organization sponsored by the church.

Clubs Foster Program to Renew Acquaintanceship of Boys and Their Dads

A closer "tie-up" between the boy and his dad is the chief objective of Boys' Week, which began yesterday, according to Vieler Kersey, president of the council for the promotion of the affair. With this idea in mind, he said, the council has asked for the co-operation of every beach and men's club in the city and sixty-five organizations have indicated a willingness to join in the movement.

The Chamber of Commerce has set aside the entire first floor of its building for the "hobby display" or boys' exposition, where every male youth will have a chance to see or display that in which he is most interested. The exposition will include stamp collections, curios, kites, electrical devices and everything conceivable which has any appeal for the normal American boy. Motion pictures will be shown and the affair will last all week, starting at 2 p.m. today.

PLAYDOM

"LADIES' NIGHT"

FRANKLIN PANGBORN PRINCIPAL

IN LIGHTWEIGHT FARCE

By Edwin Schallert

Franklin Pangborn has the most to

do with making "Ladies' Night"

amusing this week at the Belmont

Theater, "Ladies' Night" being a

rather typical Avery Hopwood farce.

It is nothing startling, though per-

haps boisterous to keep its audience

uproarious over the bright spots.

A few years ago this theatrical

piece would probably have seemed a

shocker. It is a good four or five

years ahead of its time, of wild-eyed

situations and mix-ups. It is also

inordinately noisy, particularly in

the Turkish bath scene—the setting

for the most of the complications.

In the plot we have one of the

familiar hapless Hopwood heroes,

whose friends set out to effect his

escape. He is taken to a gay

night-life resort, which is raided, and

in the attempt to escape finds his

way into a Turkish bath on ladies

night.

Once there, of course, he has to

slay, owing to the presence outside of

the police making the raid. Things

are further jumbled by the presence

of his wife and various friends in the

establishment, and his own desire to

conceal his identity because of his

previous escapades.

It may be further remarked that

before his adventure he was quite

susceptible to embarrassment upon

seeing the revelations of feminine

pudorifics resultant from a de-

cote gown. The effect of his ex-

periences when he encounters women in

various stages of undress while ap-

tempting to avoid detection in the

Turkish bath, is to cure him of his

sensitiveness.

This is one of the shallowest of

Hopwood farces, and even the bright

lines are not particularly evident.

There is the usual line of innuendo

and suggestive incident to Hopwood

comedy of this sort, but for the most

part this is quite innocuous. Most

amusing perhaps is the get-up of the

male characters where they attempt

to avoid detection during the Tur-

kish bath scene.

The tempo of the show was slow

last evening, and the dialogue was

not always put over in the clear-cut

rapid-fire fashion that is necessary

for a piece of this kind. Pangborn's

antics are, however, amusing.

There is a large cast which in-

cludes Irene Baldwin (Mrs. Bessie

Denny), Ann Tuman, Mia Marvin,

Betty Byrd, Babe London, Leonard

Doyle, Tudor Owen, Phyllis Ware

and various others. They have ap-

plause with Pangborn, who is really

the star.

A Gracious Lady Meditates

"Vagabond King," Musical

Play, Will Open; Another

Drama at Mason

The ever-changing fortunes of the

theater bring two new stage produc-

tions to the Los Angeles boards this

evening. First, the musical, "The Vag-

abond King," takes possession of the

Belmont; and Lucille La Verne in

"Run-Up" comes to the Mason stage.

Because of the immensity of the

production of "The Vagabond King"

and the length of the program, the

curtain will rise at 8:10 sharp. The

final curtain is announced for 11:15.

A special train of eight cars from

San Francisco brought the 150 mem-

bers of the organization to this city

last evening. Familiar names in the

cast include H. Cooper, O'Neil, and

Alice Belmont. O'Neil, English actress,

Genevieve Wallin, said to be a lyric

soprano of rare voice and beauty,

will be seen in the part of Katherine

de Vaucelles.

Miss La Verne, star of "Run-Up,"

recently returned from London where

she filled a highly successful engage-

ment in that play and where she was

socialized one of the greatest ac-

tresses ever sent over from the United

States. Following her London ap-

pearances she presented "Run-Up" in

New York and Chicago.

Miss Wallin has delved into the

mountains of the Casanova for the

local of her play and has written,

it is reported, a story of intense ap-

peal and many dramatic surprises.

Richard Dix, that ace of male

Paramount stars, has signified his

intention of appearing in person to-

night—somewhere between 7 and 8

o'clock at the Metropolitan

Theater, where his latest vehi-

cle, "Knockout Reilly," is being

presented. The picture has been

a success in every city it has

visited, and it is expected that

it will continue to be so.

A authenticity

is added to the light scene by the

presence of such well-known pugil-

istic personages as Jack Remick, Har-

ry O'Brien, Joe Humphries and

others. The feminine lead in "Knock-

out Reilly" is played by Mary Brian.

On the magic stages at the Metro-

politan Theater Eddie Peabody, wis-

dom of humor, is seen in "Horse-

ties," the new Jack Partington pres-

entation.

Among those who will attend the

opening of Theodore Dreiser's "An

American Tragedy" at the Majestic

Theater tonight will be Patrick

Kearney, who dramatized the story

for the stage, according to the man-

agement.

Preceding the play Mr. Kearney will

give a dinner at Victor Hugo's

company by his guests he will then

attend the performance.

About twenty guests, among whom

will be King Vidor, John Gilbert, Be-

ssie Love, Laurence Stallings, Pas-

cal, Miller, Eleanor Boardman,

Helen Krumpholtz, Lorna Moon, Arthur

Hochberg and Paul Bern, will be with

Mr. Kearney to welcome the play's

opening.

During one of the intermissions

Kearney will speak briefly concern-

ing the play.

SET TONIGHT FOR

SHAKESPEARE EVENT

Tonight, starting promptly at 8:45

o'clock, Los Angeles will have its first

opportunity to see Alice Gentile, prima

donna, as a Shakespearean actress.

With R. D. MacLean, a festival of

Shakespeare will be offered at the

Beaux Arts Auditorium. MacLean's

performance as a Shakespearean inter-

preter is nationally recognized, and the

debut of Alice Gentile on the speaking

stage should be a memorable one.

The affair promises to be one of

the most colorful and interesting of

RODEO CROWDS
BREAK RECORDThousands Unable to Get Into
Saugus ExhibitionSan Fernando Roads Blocked
for Many HoursEstimate 13,000 Cars Parked
Near Baker RanchThe biggest crowd of spectators
and the worst traffic jam the San
Fernando Valley ever saw resulted
yesterday at the second annual rodeo
at the Baker Ranch, Saugus. Some
25,000 achieved their purpose of seeing
the rodeo, but a crowd variously
estimated at 25,000 to 35,000 failed to
get in.More than 13,000 automobiles were
parked in the vicinity of Saugus and
at midnight some of these were still
trying to untangle themselves, while
roads in all directions were blocked
for hours after the finish of the spec-
tacle.NEW RECORD SET
The rodeo itself went off brilliantly,
with no serious accidents. The
contestants numbered 125 cowboys
and cowgirls, and all the contests
were fought out spiritedly. It is be-
lieved several new records were set
at the affair, but officials were still
checking last night to make sure.The crowd began arriving early, by
automobile, by train and even on
foot and the arena was crowded to
capacity long before the show was
scheduled to start. A Southern Pa-
cific special train of thirteen cars
brought 1800 people to the Baker
Ranch, many of them standing up,
but on the return trip the number
of cars was increased to twenty-eight
and these were well filled.CONTEST WINNERS

TRADE DISPUTE BODY READY

Board Will Act Under New Law Authorizing It to
Settle Many Commercial TanglesThe Commercial Board of Los Angeles at its office in the Rives-Brown
Building, today stands ready to set in motion machinery for the legalizing
of arbitration as sanctioned under the new State commercial arbitration
law just signed by Gov. Young, according to announcement yesterday of
Manso Zan, managing director of the board.Under the law recently passed by the Legislature, settlement of com-
mercial disputes through arbitration
rather than by court procedure, is
made possible.The law is based on legislation
now in commercial operation in New
York, Massachusetts, Pennsylvania
and Oregon, which States have ac-
tively maintained the practice of
recognition by the courts of settle-
ments by arbitration to the same
extent that court decisions are recog-
nized. The Federal government has
adopted a similar law with refer-
ence to interstate commerce, admin-
istrative and maritime matters, and
thirty-five other States are at the
present time said to be considering
the same kind of legislation, accord-
ing to Mr. Zan.AGREES TO ACCEPT
The new method of settle-
ment of disputes involves the sub-
mission to arbitrators of controver-
sies over money or property. To
make the settlement legally valid,
the parties to the controversy must
agree at the time of entering into
the transaction that led to the dis-
pute that they would abide by an ar-
bitration settlement.The advantages of this new method
of avoiding expensive, long and bit-
ter struggles in the courts are
many. First, the parties to the
dispute are not bound by the
court's decision, which now takes
months and even years are often
out in a few days or at the outside,
a few weeks. When they are forced
through arbitration methods, men
as well as business concerns, hat-
ing and on a friendly ground, retain the goodwill that is
so important and which invariably
is lost in court actions.The new law also permits the
coming together of those who are
about to take their disputes to the
courts and instead agree upon an ar-
bitrator and immediately upon such
agreement binding by both dis-
putants, the arbitrator takes on the
legal power of a judge and his de-
cision is final and cannot be
overruled, except by the State
Supreme Court.The new law also permits the
coming together of those who are
about to take their disputes to the
courts and instead agree upon an ar-
bitrator and immediately upon such

Devastation in Lower Reaches of Mississippi Valley Continues

The Most Spectacular Battle That Has Ever Been Fought Against the Encroachments of the Mighty Mississippi River is in progress along the lower reaches of the "Father of Waters," where levees are being dynamited and thousands of acres of valuable agricultural land cast to the implacable stream in an effort to save New Orleans. Secretary of Commerce Hoover is personally directing on the ground the work of rescue. The steamer Chisco (left) has been serving him as headquarters. Middle, workers on New Orleans water front strengthening levee. At right, a negro refugee camp on the levee at Greenville, Miss. (P. & A. photos.)

Sir Harry is Backing Sir Thomas to the extent of four shillings in the next American Yacht cup races. And that's a big bet for Sir Harry Lauder (right) as Sir Thomas Lipton (left) well realizes. They're a couple of good Scots from across the pond. (P. & A. photo.)

Something New in the Way of Dolls was brought into the port of Los Angeles Saturday by Miss Estelle Bradley, better known as "Miss Atlanta," when the steamer Calawali docked. Miss Bradley and her unique native doll are caught above by the camera-man. (Times Photo.)

A Royal Fisherman Trying Out His Luck! It's the Duke of York throwing a mean line in the Tongariro River in New Zealand, where salmon are both voracious and virile. The Duke turned in a full creel at the end of his day of angling in the stream. (Acme.)

The Mellon of Mexico, Montes de Oca, head of the treasury department, who has been endowed with unusual authority in straightening out the finances of Mexico, shown above. (P. & A. photo.)

A Severe Shock to the Aeronautical World Was the Destruction of the biplane American Legion, America's principal entry in the trans-Atlantic flight, in which Commander Noel Davis and Lieut. S. H. Wooster met their deaths at Langley Field, Va., last week. The big plane is shown as it crashed in fatal flight. (P. & A. photo.)

Mammoth Benefit Performance to be Staged by Al Malaikah Temple of the for sufferers in the Mississippi River floods, will introduce an all-star performers seldom equaled anywhere. Entertainers by the score are the management for places on the bill. Above is "Wooden Soldier" of features.

For Twenty-nine Years Leader of the Famous Marine Band, Capt. W. H. Branson (left) retired the other day, turning over his baton to Capt. Taylor, shown at right receiving the symbol of authority. The marine band was organized 128 years ago and Capt. Branson will be the seventeenth leader of it. (P. & A. photo.)

If You See This Man, report his whereabouts to the police. He is John Earley, notorious leper, recently escaped from the leper colony at Carville, La. (P. & A. photo.)

If Everyone Would Follow the Lead of Sheriff Becker of Oakland, the practice of identifying a man through both signature and photograph would be eliminated in a short time. Sheriff Becker with one of the checks identifies through both signature and photograph. (P. & A. photo.)

OUR HISTORY IN PICTURES 705

The Battle of the Crater.

by J. CARROLL MANSFIELD

AT 3:30 A. M., JULY 30, 1864, THE FEDERALS LIGHTED THE FUSE OF THE GREAT MINE THEY HAD DUG BENEATH THE "ELLIOTT'S SALIENT" FORT, THAT FORMED AN IMPORTANT PART OF THE CONFEDERATE DEFENSES AT PETERSBURG, VIRGINIA. AN HOUR PASSED WHILE UNION TROOPS, MASSED FOR THE ATTACK THAT WAS TO FOLLOW, WAITED IN SUSPENSE.

WHO BRAVE MEN, ENTERING THE TUNNEL, FOUND THAT THE FUSE HAD DIED OUT, AND RELIGHTED IT. THIS TIME THE 6,000 POUNDS OF POWDER STORED IN THE MAGAZINES BLEW UP, AND WHERE THE FORT HAD STOOD, THERE APPEARED A GREAT, SMOKING HOLE FILLED WITH WRECKAGE AND THE FORMS OF DEAD AND WOUNDED MEN.

AFTER THE EXPLOSION, STRONG COLUMNS OF WHITE AND COLORED UNION TROOPS BRAVELY POURED INTO THE CRATER, BUT FOUND IT HARD TO SCALE THE SLIPPERY SIDES AT THE FURTHER END. THIS DELAY GAVE THE CONFEDERATES TIME TO RECOVER FROM THEIR SURPRISE, AND A WITHERING FIRE WAS CONCENTRATED UPON THE CRATER.

HERDED TOGETHER IN THE CRATER, THE ASSAILANTS WERE UNABLE TO ADVANCE TO RETREAT, AND THE DEFENDERS, AFTER REPEATED CHARGES SUCCEEDED IN BRINGING THEIR ORIGINAL LINE, AND CUTTING OFF THE UNION LOSS AT THE CRATER WAS 5,700 MEN OF THE CONFEDERATES ABOUT 1,400.
